Responses: 400 respondents; 400 responses.

Estimated Time per Response: 3.166 hours.

Frequency of Response: On occasion reporting requirement; Every 5 years reporting requirement.

Total Annual Burden: 1,266 hours.

Total Annual Costs: \$98,000.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in Sections 154(i), 308 and 309 of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Privacy Impact Assessment(s): No impact(s).

Needs and Uses: This filing is the application for a Cable Television Relay Service (CARS) microwave radio license. Franchised cable systems and other eligible services use the 2, 7, 12 and 18 GHz CARS bands for microwave relays pursuant to part 78 of the Commission's Rules. CARS is principally a video transmission service used for intermediate links in a distribution network. CARS stations relay signals for and supply program material to cable television systems and other eligible entities using point-to-point and point-to-multipoint transmissions. These relay stations enable cable systems and other CARS licensees to transmit television

broadcast and low power television and related audio signals, AM and FM broadcast stations, and cablecasting from one point (e.g., on one side of a river or mountain) to another point (e.g., the other side of the river or mountain) or many points ("multipoint") via microwave. The filing is done for an initial license, for modification of an existing license, for transfer or assignment of an existing license, and for renewal of a license after five years from initial issuance or from renewal of a license. Filing is done in accordance with Sections 78.11 to 78.40 of the Commission's Rules. The form consists of multiple schedules and exhibits, depending on the specific action for which it is filed. Initial applications are the most complete, and renewal applications are the most brief. The data collected is used by Commission staff to determine whether grant of a license is in accordance with Commission requirements on eligibility, permissible use, efficient use of spectrum, and prevention of interference to existing stations.

OMB Control Number: 3060-0938.

Title: Application for a Low Power FM Broadcast Station License, FCC Form 319.

Form Number: FCC Form 319.

Estimated Time per Response: 1 hour.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 200 hours.

Total Annual Costs: \$27,500.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in Sections 154(i), 303 and 308 of the Communications Act of 1934, as amended.

Privacy Impact Assessment(s): No impacts.

Needs and Uses: On January 20, 2000, the Commission adopted a Report and Order (R&O) in MM Docket No. 99-25, In the Matter of Creation of Low Power Radio Service. With the adoption of this R&O, the Commission authorized the licensing of two new classes of FM radio stations, generally referred to as low power FM stations (LPFM): a LP100 class for stations operating at 50-100 watts effective radiated power (ERP) at an antenna height above average terrain (HAAT) of 30 meters; and a LP10 class

for stations operating at 1-10 watts ERP and an antenna height of 30 meters HAAT. These stations will be operated on a noncommercial educational basis by entities that do not hold attributable interests in any other broadcast station or other media subject to the Commission's ownership rules. The LPFM service authorized in this Report and Order provides significant opportunities for new radio services. The LPFM service creates a class of radio stations designed to serve very localized communities or underrepresented groups within communities.

In connection with this new service, the Commission developed a new FCC Form 319, Application for a Low Power FM Broadcast Station License. FCC Form 319 is required to apply for a license for a new or modified Low Power FM (LPFM) station.

Respondents: Business and other for-profit entities; Not-for-profit institutions.

Number of Respondents and

Responses: 5,000 respondents; 5,000 responses.

Estimated Time per Response: 0.5 hours.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 2,500 hours.

Total Annual Costs: None.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in 154(i), 303, 308, 309 and 621 of the Communications Act of 1934, as amended.

Privacy Impact Assessment(s): No impact(s).

Needs and Uses: Under 47 CFR Section 76.1610, cable operators must notify the Commission of changes in ownership information or operating status within 30 days of such change. FCC Form 324 is used to update information filed with the Commission concerning the Cable Community Registration. The information is the basic operational information on operator name, mailing address, community served, and system identification. FCC Form 324 will cover a variety of changes related to cable

operators, replacing the requirement of a letter containing approximately the same information. Every Form 324 filing will require information about the system—the additional information required depending largely upon the nature of the change.

Proposed Project

Monitoring Outcomes of the Enhanced Comprehensive HIV Prevention Plan (ECHPP) Project -New-National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The scope of the HIV epidemic in the United States is significant, particularly in large urban areas where HIV/AIDS cases are concentrated. In 2006, approximately 56,000 new HIV infections occurred in the U.S., demonstrating the need to expand targeted HIV prevention efforts. In 2010, twelve U.S. metropolitan statistical areas (MSAs) received funding, through their city and state health departments, to conduct the Enhanced Comprehensive HIV Prevention Planning (ECHPP) project. These twelve MSAs (Atlanta, GA; Baltimore, MD; Chicago, IL; Dallas, TX; District of Columbia; Houston, TX; Los Angeles, CA; Miami, FL; New York City, NY; Philadelphia, PA; San Francisco, CA; and San Juan, PR) had the highest AIDS prevalence rates in the U.S. at the end of 2007, representing 44% of all U.S. AIDS cases. The purpose of ECHPP is to enhance existing HIV prevention services in these high prevalence areas and provide an optimal mix of evidence-based behavioral, biomedical, and structural interventions to have maximum impact on the HIV/AIDS epidemic at the community level. ECHPP goals are consistent with CDC's Division of HIV/AIDS Prevention Strategic Plan for HIV Prevention and

with the National HIV/AIDS Strategy: (1) Prevent new HIV infections, (2) increase linkage to, and impact of, prevention and care services for HIV-positive individuals, and (3) reduce HIV-related health disparities.

To evaluate ECHPP's impact on the HIV/AIDS epidemic at the community level, data will be collected through both existing CDC data sources and through new data collection activities. Existing CDC data sources will include HIV surveillance systems (e.g., National HIV Behavioral Surveillance System, Medical Monitoring Project) that routinely collect information about behavioral and clinical outcomes from at-risk target populations in the 12 MSAs. A new data collection activity is proposed through this project to collect information about behavioral and clinical outcomes from injection drug users, high-risk heterosexuals, and HIV-positive individuals who access medical care in six of the 12 ECHPP-funded MSAs. These MSAs are: District of Columbia; Houston, TX; Los Angeles, CA; Miami, FL; New York City, NY; and San Francisco, CA. The purpose of this new data collection activity is to monitor community-level outcomes of ECHPP and supplement HIV surveillance data routinely collected in these areas. Outcome data will be collected in these MSAs at two time points between 2012 and 2014.

Two surveys will be used in this project: (1) A community-based survey to be administered to injection drug users and high-risk heterosexuals, and (2) a clinic-based survey to be administered to HIV-positive individuals seeking care at clinics that provide HIV-related services. Both surveys will collect data on demographics, sexual behavior, alcohol and drug use history, HIV testing experiences, exposure to HIV prevention messages, and participation in HIV prevention activities. The clinic survey will also include questions about HIV treatment, treatment adherence, sources of care, and medical outcomes. For the community survey, for each of the two data collection periods, we intend to recruit and screen 750 injection drug users and 750 high-risk heterosexuals using venue-based, convenience sampling methods. For the clinic survey, we intend to recruit and screen 1400 HIV-positive individuals seeking HIV care at medical clinics. A total of 600 eligible injection drug users (age > 18 yrs), 600 eligible high-risk heterosexuals (age 18 to 60 yrs), and 1200 eligible HIV-positive individuals (age > 18 yrs) will be surveyed. CDC will collaborate with local health department staff and outreach workers
