II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the PCX included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it had received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The PCX has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to modify PCXE Rule 1.1 for the purpose of modifying the ArcaEx calculation of the Market Imbalance. Currently, the Market Imbalance, as it relates to the Market Order Auction, is defined as the imbalance of any remaining buy (sell) Market Orders that are not matched for execution during the Market Order

Auction.⁴ As such, all eligible Market and Limit Orders that are eligible for execution in the auction against Market Orders are taken into consideration when calculating the Market Imbalance for the Market Order Auction. Similarly, the Market Imbalance for the Closing Auction is defined as the imbalance of any remaining buy (sell) Market-on-Close ("MOC") Orders that are not matched for execution during the Closing Auction.⁵ As such, all eligible MOC, Limit and Limit-on-Close ("LOC") Orders that are eligible for execution in the Closing Auction against MOC Orders are taken into consideration when calculating the Market Imbalance for the Closing Auction.

The Exchange proposes to modify the Market Imbalance calculation for both the Market Order Auction and the Closing Auction such that it will only take into consideration Market Orders (for the Market Order Auction) and MOC Orders (for the Closing Auction) in determining the Market Imbalance. For example, the Market Imbalance will be calculated as the imbalance of any buy (sell) Market Orders (for the Market Order Auction) and buy (sell) MOC Orders (for the Closing Auction) that remain after executing against sell (buy) Market Orders (for the Market Order Auction) and executing against sell (buy) MOC Orders (for the Closing Auction). Accordingly, the new Market Imbalance calculation will not take Limit and LOC Orders eligible for execution in the applicable auction into consideration.

The Exchange believes that by modifying the Market Imbalance calculation, it provides better information about the nature of the imbalances in the applicable auction. In particular, currently the Market Imbalance results in zero if there are a sufficient number of Limit Orders or LOC Orders in the auction that are executable against Market Orders or MOC Orders. By limiting the Market Imbalance calculation to exclusively Market Orders and MOC Orders matched for execution, the Exchange would provide Users⁶ with more information about the number of Market Orders and MOC Orders available for execution on the side of the market with an excess number of such orders during the applicable auction.

The following example illustrates the impact of the proposed modification on the calculation of the Market Imbalance as it relates to the Closing Auction:

Current Market Imbalance Calculation

Buy 100,000 MOC
Sell 50,000 LOC @22.00
Sell Limit Orders in the book = 90,000 @23.00
Matched Volume = 100,000
Indicative Match Price = 23.00
Total Imbalance = - 40,000
Market Imbalance = 0

Proposed Market Imbalance Calculation

Buy 100,000 MOC
Sell 50,000 LOC @22.00
Sell Limit Orders in the book = 90,000 @23.00
Matched Volume = 100,000
Indicative Match Price = 23.00
Total Imbalance = - 40,000
Market Imbalance = +100,00
If a User were to enter a Sell 25,000 MOC Order, then
Market Imbalance = +75,000.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,⁷ in general, and furthers the objectives of Section 6(b)(5),⁸ in particular, because it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments and perfect the mechanisms of a free and open market and to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The PCX does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the PCX consents, the Commission will:

(A) By order approve such proposed rule change, as amended; or

(B) Institute proceedings to determine whether the proposed rule change, as amended, should be disapproved.
