II. Background

A. Purpose of FIFRA SAP

FIFRA SAP serves as the primary scientific peer review mechanism of EPA's Office of Prevention, Pesticides and Toxic Substances (OPPTS) and is structured to provide scientific advice, information and recommendations to the EPA Administrator on pesticides and pesticide-related issues as to the impact of regulatory actions on health and the environment. FIFRA SAP is a Federal advisory committee established in 1975 under FIFRA that operates in accordance with requirements of the Federal Advisory Committee Act. FIFRA SAP is composed of a permanent panel consisting of seven members who are appointed by the EPA Administrator from nominees provided by the National Institutes of Health and the National

Science Foundation. FIFRA, as amended by FQPA, established a Science Review Board consisting of at least 60 scientists who are available to the SAP on an ad hoc basis to assist in reviews conducted by the SAP. As a peer review mechanism, FIFRA SAP provides comments, evaluations and recommendations to improve the effectiveness and quality of analyses made by Agency scientists. Members of FIFRA SAP are scientists who have sufficient professional qualifications, including training and experience, to provide expert advice and recommendation to the Agency.

B. Public Meeting

Atrazine is currently one of the most widely used agricultural pesticides in the United States, with approximately 70 million pounds of active ingredient applied domestically per year. First registered for use in December 1958, its primary uses are on corn and sugarcane, and to a lesser extent, on residential lawns in the Southeast. Consistent with the requirements of FIFRA and FFDCA, EPA and its predecessor agencies have required extensive evaluation of the potential adverse effects of atrazine over the years. Based on these extensive evaluations, most recently in 2003, EPA had determined that atrazine can be used with a reasonable certainty of no harm to human health if the product is used according to the label. Nonetheless, concerns have been raised recently about the health impacts of atrazine. Since 2003, there have been many studies of its ability to cause health effects. In order to evaluate this new science, EPA is launching a year long, comprehensive scientific re-evaluation of the potential human health impacts of atrazine by using information about atrazine's mode of action and by carefully considering the potential for cancer and non-cancer effects based on the available data from laboratory animal and human epidemiology studies.

The Agency relies on transparency and sound science, including independent scientific peer review, to inform its regulatory decisions. The Agency's 2003 evaluation of atrazine provided a detailed evaluation of the mode of action and human health effects of atrazine. Through a series of SAP meetings, EPA's evaluation of the new scientific evidence available since that time will be described in the context of how it is similar to or differs from that available for the last atrazine assessment, and how this new evidence does or does not affect the Agency's human health risk assessment of atrazine.

In the kick-off meeting to be held on November 3, 2009, the Panel members and public will be informed about EPA's plans for three subsequent SAP meetings to be held in February, April and September, 2010.

In February 2010 the Agency will present its proposed approach for incorporating epidemiology and human incident data in the risk assessment. It will also present its evaluations of the human epidemiology studies which use an ecological design that have been published since the last atrazine assessment. The SAP will be asked to comment on the soundness of the scientific approach.

At the April 2010 meeting, EPA will present its evaluation of non-cancer effects based on an evaluation of studies used in past assessments, as well as those that have been published since then. The Agency will also present new data on alternative modes of action not considered in the 2003 evaluation as well as EPA's plans for sampling frequency and monitoring of community water systems. The SAP will be asked to comment about the soundness of the scientific approach.

In September 2010, EPA will discuss its evaluation of cancer effects, based on an evaluation of studies used in past assessments, as well as those that have been published since then, including new findings from the Agricultural Health Study anticipated in 2010. EPA will also present any changes to its plans for monitoring community water systems based on its analysis and the SAP's guidance from the April meeting. Further, any new scientific developments related to the Agency's evaluation of non-cancer effects or setting the FQPA safety factor which may have become available since the April meeting will also be presented. The SAP will be asked to comment about the soundness of the scientific approach.

At the end of this year-long effort, the Agency will determine if the current risk assessment for atrazine should be revised and whether or not the Agency's current regulatory position and community water system monitoring requirements should be changed.

C. FIFRA SAP Documents and Meeting Minutes

EPA's background paper, related supporting materials, FIFRA SAP panel members, and the meeting agenda will be available by mid-October for the November 3, 2009 meeting. In addition, the Agency may provide additional background documents as the materials become available. You may obtain electronic copies of these documents,

and certain other related documents that might be available electronically, at <http://www.regulations.gov> and the FIFRA SAP homepage at <http://www.epa.gov/scipoly/sap>.

FIFRA SAP will prepare meeting minutes summarizing its recommendations to the Agency approximately 90 days after the meeting. The meeting minutes will be posted on the FIFRA SAP website or may be obtained from the OPP Regulatory Public Docket at <http://www.regulations.gov>.

Notice of Public Meeting of the Interagency Steering Committee on Radiation Standards

AGENCY: Environmental Protection Agency.

ACTION: Notice of public meeting.

SUMMARY: The Environmental Protection Agency (EPA) will host a meeting of the Interagency Steering Committee on Radiation Standards (ISCORS) on October 15, 2009, in Washington, DC. The purpose of ISCORS is to foster early resolution and coordination of regulatory issues associated with radiation standards. Agencies represented as members of ISCORS include the following: EPA; Nuclear Regulatory Commission; Department of Energy; Department of Defense; Department of Transportation; Department of Homeland Security; Department of Labor's Occupational Safety and Health Administration; and the Department of Health and Human Services. ISCORS meeting observer agencies include the Office of Science and Technology Policy, Office of Management and Budget, Defense Nuclear Facilities Safety Board, as well as representatives from both the States of Illinois and Pennsylvania. ISCORS maintains several objectives: (1) Facilitate a consensus on allowable levels of radiation risk to the public and workers; (2) promote consistent and scientifically sound risk assessment and risk management approaches in setting and implementing standards for occupational and public protection from ionizing radiation; (3) promote completeness and coherence of Federal standards for radiation protection; and (4) identify interagency radiation protection issues and coordinate their resolution. ISCORS meetings include presentations by the chairs of the subcommittees and discussions of current radiation protection issues. Committee meetings normally involve pre-decisional intra-governmental discussions and, as such, are normally not open for observation by members of the public or media. One of the four ISCORS meetings each year is open to all interested members of the public. There will be time on the agenda for members of the public to provide comments. Summaries of previous ISCORS meetings are available at the ISCORS Web site, <http://www.iscorg.org>. The final agenda for the October 2009 meeting will be posted on the Web site shortly before the meeting.
