Abstract: The United States Environmental Protection Agency (EPA) promulgated the Air Emissions Reporting Requirements (AERR) on December 17, 2008 (73 FR 76539). The AERR consolidated and streamlined previous requirements of several older rules for State, Territorial, and local air pollution control agencies to report air emissions to the EPA annually. The ICR is being submitted to renew EPA's authority to collect air emissions-related information from States and local agencies for the three-year cycle that will include emissions reporting for inventory years 2012, 2013, and 2014, which are due to be reported on December 31 of the year following each inventory year.

Under the final AERR ICR, 55 State and Territorial air quality agencies, including the District of Columbia (DC), and an estimated 49 local air quality agencies, must annually submit emissions data for point sources emitting specified levels of oxides of nitrogen (NO_x), carbon monoxide (CO), sulfur dioxide (SO₂), volatile organic compounds (VOCs), particulate matter
