BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-335 and 50-389]

Florida Power and Light Company, et al., St. Lucie Plant, Unit Nos. 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of amendments to Facility Operating License Nos. DPR-67 and NPF-16, issued to Florida Power and Light Company, *et al.* (the licensee), for operation of the St. Lucie Plant, Unit Nos. 1 and 2, respectively, located in St. Lucie County, Florida. Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would increase the wet storage capacity of fuel assemblies at the St. Lucie Plant, Units 1 and 2. A freestanding fuel storage rack module would be installed in the cask pit in each unit's fuel-handling building. The Unit 1 rack is being designed to augment storage capacity from 1706 fuel assemblies to 1849 fuel assemblies, an increase of 143 fuel assemblies. The Unit 2 rack design has closer assembly-to-assembly spacing than the Unit 1 rack and is capable of storing 225 fuel assemblies. The storage capacity of Unit 2 will increase from 1360 fuel assemblies to 1585 fuel assemblies, an increase of 225 fuel assemblies. The cask pit fuel storage racks will use Boral as a neutron absorbing poison.

The proposed action is in accordance with the licensee's application for amendments dated October 23, 2002, as supplemented August 28 and December 11, 2003, and February 3 and March 25, 2004.

The Need for the Proposed Action

The St. Lucie nuclear plant has two pressurized-water reactors. Unit 1 commenced operation in 1976 and Unit 2 in 1983. Based on the current licensed capacity, current spent fuel inventory, and the projected discharges of spent fuel, Unit 1 will lose the capability to fully offload the reactor core by the year 2005. Unit 2 will lose the capability to fully offload the reactor core by the year 2007. To extend this capability beyond the above dates, the licensee has proposed license amendments to install a freestanding fuel storage rack module in the cask pit of each unit's fuel-handling building.

The additional storage capacity provided by the cask pit racks will be used to store spent fuel to allow refueling outage fuel offloads and non-outage fuel shuffles. In addition, the Unit 1 cask pit rack will be used to temporarily store new fuel before an outage, prior to loading into the reactor core. The capability to remove, clean, and store the cask pit racks in an alternate location prior to any spent fuel cask loading operations will be maintained, because the cask pits will eventually be needed for loading fuel into transfer casks.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation and concludes, as set forth below, that there are no significant environmental impacts associated with the proposed amendments. The details of the staff's safety evaluation will be provided in the license amendments when they are issued by the NRC.

During refueling outages, there may be a slight increase in the amount of heat that has to be removed from the combination of the spent fuel pool and the cask pit. The peak increase will be less than one percent, and the heat load from spent fuel storage is very small compared to the heat load from normal plant operations. Therefore, the overall increase in the amount of heat released will be quite small and insignificant.

Even though additional boron poison will be introduced by the Boral panels in the storage racks in the cask pit, no significant increase in tritium production from the neutron capture by boron-10 is expected.

The proposed action will not significantly increase the probability or

consequences of accidents, no changes are being made in the types of effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (*i.e.*, the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resources than those previously considered in the Final Environmental Statement related to the St. Lucie Plant Unit 1, dated June 1973; the Final Environmental Statement related to the operation of St. Lucie Plant, Unit No. 2 (NUREG-0842), dated April 1982; and Supplement 11 to NUREG-1437, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants Regarding St. Lucie, Units 1 and 2," dated May 2003.

Agencies and Persons Consulted

On May 19, 2004, the staff consulted with the Florida State official, William Passetti of the Department of Health, Bureau of Radiation Control, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated October 23, 2002, as supplemented by letters dated August 28 and December 11, 2003, and February 3 and March 25, 2004. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area 01F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff at 1-800-397-4209, or 301-415-4737, or send an e-mail to pdr@nrc.gov.

Dated in Rockville, Maryland, this 2nd day of July 2004.

For the Nuclear Regulatory Commission.

Brendan T. Moroney,

Project Manager, Section 2, Project Directorate II, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 030-34881]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment for Fujirebio Diagnostics, Inc.'s Facility in Malvern, PA

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Availability of Environmental Assessment and Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT:

Jenny M. Johansen, Nuclear Materials Safety Branch 2, Division of Nuclear Materials Safety, Region I, 475 Allendale Road, King of Prussia, Pennsylvania, 19406, telephone (610) 337-5071, fax (610) 337-5269; or by e-mail: jmj@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to Fujirebio Diagnostics, Inc. for Materials License

No. 37-30487-01, to authorize release of its facility in Malvern, Pennsylvania for unrestricted use. NRC has prepared an Environmental Assessment (EA) in support of this action in accordance with the requirements of 10 CFR part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following the publication of this notice.

II. EA Summary

The purpose of the proposed action is to authorize the release of the licensee's Malvern, Pennsylvania facility for unrestricted use. Fujirebio Diagnostics, Inc. was authorized by NRC from December 30, 1998, to use radioactive materials for research and development, manufacturing and distribution, and calibration purposes at the site. On April 19, 2004, Fujirebio Diagnostics, Inc. requested that NRC release the facility for unrestricted use. Fujirebio Diagnostics, Inc. has conducted surveys of the facility and determined that the facility meets the license termination criteria in subpart E of 10 CFR part 20. The NRC staff has prepared an EA.

III. Finding of No Significant Impact

The staff has prepared the EA (summarized above) in support of the proposed license amendment to release the facility for unrestricted use. The NRC staff has evaluated Fujirebio Diagnostics, Inc.'s request and the results of the surveys and has concluded that the completed action complies with the criteria in subpart E of 10 CFR part 20. The staff has found that the environmental impacts from the proposed action are bounded by the impacts evaluated by the "Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Facilities" (NUREG-1496). The staff has also found the non-radiological impacts are not significant. On the basis of the EA, the NRC has concluded that the environmental impacts from the proposed action are expected to be insignificant and has determined not to prepare an environmental impact statement for the proposed action.

IV. Further Information

The EA and the documents related to this proposed action, including the application for the license amendment and supporting documentation, are available for inspection at NRC's Public Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html> (ADAMS Accession Nos. ML041250426,

ML041470132 and ML041830049). The PDR reproduction contractor will copy documents for a fee. These documents are also available for inspection and copying for a fee at the Region I Office, 475 Allendale Road, King of Prussia, Pennsylvania, 19406. Persons who do not have access to ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-397-4209 or (301) 415-4737, or by e-mail to pdr@nrc.gov.

Dated in King of Prussia, Pennsylvania this 1st day of July, 2004.

For the Nuclear Regulatory Commission.

John D. Kinneman,

Chief, Nuclear Materials Safety Branch 2, Division of Nuclear Materials Safety, Region I.

BILLING CODE 7590-01-P

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

Summary: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the Railroad Retirement Board (RRB) has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s):

- (1) *Collection title:* Placement Service.
- (2) *Form(s) submitted:* ES-2, ES-21, ES-21c, UI-35, and Job Vacancies Reports.
- (3) *OMB Number:* 3220-0057.
- (4) *Expiration date of current OMB clearance:* 10/31/2004.
- (5) *Type of request:* Revision of a currently approved collection.
- (6) *Respondents:* Individuals or households, business or other for-profit, State, local or tribal government.
- (7) *Estimated annual number of respondents:* 9,500.
- (8) *Total annual responses:* 23,000.
- (9) *Total annual reporting hours:* 1,452.

(10) *Collection description:* Under the RUIA, the Railroad Retirement Board provides job placement assistance for unemployed railroad workers. The collection obtains information from job applicants, railroad employers and State Employment Service offices for use in placement, for providing referrals for job openings, reports of referral results and for verifying and monitoring claimant eligibility.

Additional Information or Comments:

Copies of the forms and supporting documents can be obtained from Charles Mierzwa, the agency clearance officer (312-751-3363) or Charles.Mierzwa@rrb.gov.
