

set of multiple passwords. There is backup capability to address issues of availability and continuity of operations. Previous week's backup tapes may be sent to an off-site storage location in some cases.

DOT limits access to monitoring software of the computer(s) to authorized personnel only. In addition, DOT limits who can use the computer(s), and limits dissemination of any passwords used to operate the computer(s). DOT maintains any hard copies of sensitive information in secure file cabinets.

RETENTION AND DISPOSAL:

The information is retained at DOT Headquarters by the system administrators and Regional Administrators. When there is no longer disk space available on the monitors' hard disks, the files are released to the operating system for re-write. This means the files are "marked" internally as eligible for the computer operating system to overwrite with subsequent data. DOT will comply with requirements of the National Archives and Records Administration (NARA). NARA regulations state that electronic files created to monitor system usage are authorized for erasure or deletion when the agency determines that they are no longer needed for administrative, legal, audit, or other operational purposes. Generally, these (and any associated hard copy) files will be authorized for deletion after 30 days unless needed for official purposes. Not all locations, HQ or regions, will be collecting information at all times.

NOTIFICATION PROCEDURE:

To determine whether the system may contain records relating to you, write to the System Manager.

RECORD ACCESS PROCEDURES:

Same as "Notification Procedure." Provide full name, assigned computer location, and a description of information that you seek, including the time frame during which the records(s) may have been generated. Individuals requesting access must comply with the Department of Transportation's Privacy Act regulations on verification of identity (49 C.F.R. 10.37).

CONTESTING RECORD PROCEDURES:

Same as "Notification Procedure" and "Record Access Procedure."

RECORD SOURCE CATEGORIES:

Information is collected from computers located at each of the Internet/Intranet Access locations. A software program installed on each of the machines retrieves the information from a hub or connection to the Internet/Intranet. Regional offices may be collecting information from time-to-time. Personal computers at data collection points are used to capture data in a passive mode. Most records are generated internally, i.e., computer

activity logs; individuals covered by the system; and management officials.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

Dated: April 24, 2002.
