

time required to accession the samples and report the results to LRN. In the cases of routine and emergency response testing, these samples are part of the workflow that each LRN laboratory already has in place. The only burden LRN is placing upon the laboratories is the time to report the results to LRN. These changes in how burden hours were determined per activity are reflected in the burden table. Per CDC Notice of Funding Opportunity (NOFO) PHEP Cooperative Agreement

CDC–RFA–TU24–0137: Public Health Emergency Preparedness (PHEP) Cooperative Agreement, LRN–C laboratories are required to participate in Surge Capacity Exercises and proficiency testing to ensure laboratory readiness to support CDC laboratory capacity during a national emergency involving chemical threats.

This data collection is vital to the continued support of the national public health system in its efforts to respond to chemical and biological threats. The

state, local, and federal public health laboratories participating in this program generate the data in this collection as part of their individual emergency response duties. By merging this data into a single collection, a local perspective of an emerging threat becomes a broader national perspective with greater depth and detail for more efficient and effective decision making. There is no cost to respondents other than their time to participate.

Estimated Annualized Burden Hours

Respondent type	Form	Number of responders	Average number of responses per responder	Average burden per response (hours)	Total burden hours
Public Health Laboratories	Laboratory Qualification	136	1	2	272
	Routine Testing Results	136	25	0.5	1,700
	Challenge Panel/Validation Testing Results.	136	2	12	3,264
	Public Health Surge Response Testing Results.	136	625	0.5	42,500
	Proficiency Testing/Characterization Results (LRN–C).	44	35	2	3,080
	Surge Event Testing Results/Exercises (LRN–C: SPaSE, Surge, ERE).	57	6	24	8,208
Total	59,024
