

OMB's implementing instructions requires all contract employees requiring routine access to federally controlled facilities for greater than six (6) months to receive a background investigation. The minimum background investigation is Tier 1 and the Office of Personnel Management offers a Tier 1C for child care.

However, there is no requirement in the law or HSPD-12 that requires childcare employees to be subject to the Tier 1C since employees of childcare providers are neither government employees nor government contractors. The childcare providers are required to complete the criminal history background checks mandated in the Crime Control Act of 1990, Public Law 101-647, dated November 29, 1990, as amended by Public Law 102-190, dated December 5, 1991. These statutes require that each employee of a childcare center located in a Federal building or in leased space must undergo a background check.

According to GSA policy, childcare workers (as described above) will need to submit the following:

1. An original signed copy of a *Basic National Agency Check Criminal History*, GSA Form 176; and
2. Two sets of fingerprints on FBI Fingerprint Cards, for SF-87 and/or electronic prints from an enrollment center.
3. Electronically submit the e-qip (SF85) application for completion of the Tier 1C.

This is not a request to collect new information; this is a request to change the form that is currently being used to collect this information.

## SUPPLEMENTARY INFORMATION:

### A. Purpose

The CDP Supply Chain Climate Change Information Request is an electronic questionnaire designed to collect information that is widely used by large private and public sector organizations to understand, assess, and mitigate potentially disruptive and costly supply chain risks, investment risks, and environmental impacts. The questionnaire is administered by CDP North America, Inc., a 501(c)(3) nonprofit organization ("CDP"). CDP administers the questionnaire annually on behalf of over 700 institutional investors, 300 major corporations, and several large governmental purchasing organizations in addition to GSA. CDP's most recent annual survey was directed to over 40,000 companies, with over 23,000 electing to respond.

Under previously approved information collection requests, GSA has directed CDP since 2017 to include several hundred major Federal contractors annually among its potential survey respondents. In accordance with 31 U.S.C. 3512(c)(1)(b), GSA uses information received from these companies via CDP to inform and develop purchasing policies and contract requirements necessary to safeguard Federal assets against waste, loss, and misappropriation resulting from unmitigated exposure to physical, market, regulatory, legal, and other types of risks in Federal supply chains. GSA also uses the information in accordance with Executive Orders 13990, 14008, 14030, and 14057 to inform development of policies and programs to reduce similar risks and environmental impacts associated with federal procurement activities.

For example, GSA has used CDP information in recent years to perform critical market research in connection with multi-billion-dollar strategic contracting efforts. In one case, GSA determined that data center facilities used by potential network infrastructure providers could be at risk due to flooding, extreme heat, or lack of available cooling water sources, placing Federal client operations at risk. In another case, GSA used information from the CDP survey to research potential contractors' existing risk

mitigation and greenhouse gas reduction practices and to design appropriate contract requirements to ensure that contractors assess and mitigate these risks and reduce greenhouse gases associated with their federal contract activities. In another case, GSA determined that energy savings practices available to potential information technology service providers could significantly lower their overhead costs and that this would likely reduce contract costs for GSA and other Federal agencies. GSA uses the information collected to research development of similar policies and programs and to verify contractor compliance with existing programs.

### B. Annual Burden Hours

GSA expects to direct CDP to request voluntary survey responses from up to 1000 large and medium-sized businesses per year. Estimates of response time per respondent vary greatly depending on whether each requested respondent (a) elects not to respond; (b) responds, but would have responded to CDP regardless of GSA's request (because the respondent was also requested to respond to CDP by other customer and/or investor stakeholders); or (c) responds to CDP because of GSA's request. Analysis of total response time is thus based on estimates for each of these categories.

(a) Requested respondents who elect not to respond.

Based on historical CDP response rates and GSA's intended recipients, GSA estimates that 680 out of 1000 annual requested respondents will be in this category. Hour burden for this category: 680 non-responses; time per respondent 0; total time 0.

(b) Respondents who would have responded to CDP regardless of GSA's request. These respondents will complete some or all of the collection instrument, but would have done so regardless of GSA's request. In addition, some of these respondents will answer a small number of additional questions (requiring a small fraction of their overall response time to CDP) based on GSA's request. In addition, all of these respondents will need to complete one additional question in order to direct CDP to share their responses with GSA. Based on historical CDP response rates and GSA's intended recipients, GSA estimates that 250 out of 1000 annual requested respondents will be in this category. Hour burden for this category: 250 responses; average time per respondent 5 minutes; total burden 21 hours.

(c) Respondents who respond to CDP because of GSA's request. These

respondents may need to invest significant time drafting their responses and gathering facts, including searching and compiling existing data sources such as utility bills, and completing and reviewing the collection instrument. Based on historical CDP response rates and GSA's intended recipients, GSA estimates that 70 out of 1000 annual requested respondents will be in this category. Based on discussions with several dozen previous respondents to CDP's questionnaire, as well as public input received in response to a related information collection request notice (see 82 FR 3794), time burden for this collection is estimated to average 120 hours per response. Hour burden for this category: 70 responses; average time per respondent 120 hours; total burden 8400 hours.

Based on the individual category response times above, the total estimated response burden for all 1000 requested respondents is summarized below.

*Frequency:* Annual.

*Affected Public:* Federal contractors.

*Number of Respondents:* 1,000.

*Responses per Respondent:* 1.

*Total Annual Responses:* 320.

*Estimated Time per Respondent:* 26.3.

*Total Burden Hours:* 8,421.

### C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary, whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.
