

the implementation of the activities described in the HCP (proposed action), including the consequences of the no-action alternative, the construction of the parking lot with no conservation measures alternative, and the proposed action. The proposed action also includes issuance of the ITP and implementation of the HCP as submitted by the applicant. The applicant anticipates that the proposed action would result in the loss of approximately 0.89 acres of occupied Alabama beach mouse habitat within the 1.40-acre footprint of the project.

Habitat Conservation Plan

The HCP covered area consists of 4.14 acres of land owned by the applicant. The HCP includes measures to avoid, minimize, and mitigate impacts to the Alabama beach mouse from construction of the parking lot. To minimize impacts to the covered species and its habitat, the applicant reduced the footprint of the parking lot. Other avoidance, minimization, and mitigation measures include, but are not limited to, trapping and relocating the species, dune enhancement and restoration, installation of sand fencing, and creation of a dune enhancement fund. The dune enhancement fund would be used to enhance habitat elsewhere within the city limits of Gulf Shores where Alabama beach mice may be found.
