

deenergization of electric power within the longwall district.

(4) Miners will be trained on mine emergency evacuation and firefighting program instructions, the approved SCSR storage plan, the approved ventilation plan, and the approved emergency response plan.

The petitioner states that the terms and conditions of this petition will not apply during the time period from completion of the development mining of the two-entry longwall panel until the beginning of the longwall equipment setup activities, provided that the conveyor belt in the two-entry panel is not energized. During this time period all other mandatory standards will apply.

The petitioner asserts that application of the existing standard will result in a diminution of safety to the miners and that the proposed alternative method will at all times guarantee no less than the same measure of protection afforded by the existing standard.

Dated: September 25, 2014.

Sheila McConnell,

Acting Director, Office of Standards, Regulations and Variances.
