For information on facilities or services for individuals with disabilities or to request special assistance at the listening session, contact Kevin Brensinger at the telephone number or email address indicated under the **FOR FURTHER INFORMATION CONTACT** section of this notice.

Basis and Purpose

The Waterways Analysis and Management System was implemented to ensure a complete and organized process for matching waterway attributes and services, most significantly the aids to navigation system, with user needs. The Missouri River study includes navigable waters from Sioux City, IA to St. Louis, MO and specifically targets the navigation channel, marking of the navigation channel, movement of commerce and navigation support for the diverse uses of the river. WAMS studies are conducted periodically to better understand users' needs and facilitate safe and effective waterways. Some of the aspects addressed by WAMS are:

- Are all the aids necessary?
- Should aids be added, changed or removed?
- Is the right aid being used for the job?
- Are the aids marked in a correct and visible manner?
- Are these aids being used properly by both the Coast Guard and the waterway users?

It is the intent of Coast Guard Sector Upper Mississippi River to collect comments and materials from this listening session, along with navigation surveys and other information, to establish and preserve the reasonable needs of navigation on this river.

This notice is issued under authority of 5 U.S.C. 552(a).

Martin Malloy,

Captain of the Port, U.S. Coast Guard Sector Upper Mississippi River.
