

bioequivalence of clozapine products.² FDA recommends that such studies be performed only in patients who have not responded well to standard antipsychotic drug treatment and who have been receiving a maintenance dose of an approved clozapine product for at least 3 months. FDA is now issuing a draft guidance for industry on BE recommendations for generic clozapine that applies specifically to the ODTs.

Beckloff Associates, Inc., filed a citizen petition in December 2007, a citizen petition supplement in February 2009, and a second citizen petition in November 2010, requesting that FDA impose certain requirements for bioequivalence testing for ANDAs referencing FazaClo (clozapine) ODTs and modify the Clozapine Guidance (Docket Nos. FDA-2007-P-0188 and FDA-2010-P-0574). FDA is denying these petitions today.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on bioequivalence recommendations for clozapine. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.
