

Finally, all disturbed areas were seeded, fertilized and mulched.

On November 4, 1999, consistent with the NFFA, TDEC's Director of Superfund approved a Record of Decision. Pursuant to the NFFA, EPA had issued a concurrence letter in October 1999. The ROD was executed on November 4, 1999. The selected alternative is institutional controls which include deed restrictions and prohibits drilling of water wells on Site. All institutional controls are currently in place. TDEC sent EPA a Certification Letter on November 4, 1999 stating the Site had been remediated to the extent practicable. Furthermore, the letter concludes that the Site appears protective of human health and the environment, complies with federal and state requirements that are applicable or relevant and appropriate to remedial action and is cost-effective. This remedy utilizes permanent solutions and alternative treatment technologies to the maximum extent practicable, and satisfies the statutory preference for remedies that employ treatment that reduces toxicity, mobility and volume. Finally, it concludes that all construction activities relative to CERCLA are complete.

In March 2000, EPA issued and TDEC concurred on the Final Close Out Report and Final Remedial Action Report. Finally, TDEC will conduct Statutory Five-Year reviews at the Site to ensure the selected remedy remains protective of human health and the environment.

VI. State Concurrence

TDEC in a letter dated June 30, 2001 concurs with EPA that the criteria for deletion of the NPL listing have been met. Therefore, EPA is deleting the ICG Iselin Railroad Yard site from the NPL, effective on January 7, 2002. However, if EPA receives dissenting comments by December 10, 2001. EPA will publish a document that withdraws this action.
