

purportedly infringe one or more claims of U.S. Patent Nos. 7,662,517; 7,638,241; 7,709,152; and 7,771,877. *Id.* The complaint also alleged the existence of a domestic industry. *Id.* The notice of investigation names SK Innovation Co., Ltd., of Seoul, Republic of Korea and SK Battery America, Inc., of Atlanta, Georgia as respondents. *Id.* The Office of Unfair Import Investigations was not named as a party. *Id.*

On March 31, 2021, the administrative law judge issued a final initial determination, which found no violation of section 337 by the respondents.

On May 25, 2021, pursuant to Commission Rule 210.21, paragraphs (a) and (b) (19 CFR 210.21(a) and (b)), the parties filed a Joint Motion to Terminate the Investigation on the Basis of a Settlement Agreement (“the Motion”). The parties also filed confidential and public versions of the settlement agreement.

The Commission has determined that the Motion complies with the requirements of Commission Rule 210.21(b)(1) (19 CFR 210.21(b)(1)) and that there are no extraordinary circumstances that would prevent the requested termination. The Commission also finds that granting the Motion would not be contrary to the public interest pursuant to Commission Rule 210.50(b)(2) (19 CFR 210.50(b)(2)). Accordingly, the Commission grants the Motion. The investigation is hereby terminated in its entirety.

The Commission vote for this determination took place on May 27, 2021.

The authority for the Commission’s determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission’s Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: May 27, 2021.

Lisa Barton,

Secretary to the Commission.

OMB Number: 3145–0220.

Type of Request: Extension without revision of an information collection.

Type of Request: Intent to seek approval to renew an information collection.

Abstract: The Engineering Research Centers (ERC) program supports an integrated, interdisciplinary research environment to advance fundamental engineering knowledge and engineered systems; educate a globally competitive and diverse engineering workforce from K–12 on; and join academe and industry in partnership to achieve these goals. ERCs conduct world-class research

through partnerships of academic institutions, national laboratories, industrial organizations, and/or other public/private entities. New knowledge thus created is meaningfully linked to society.

ERCs conduct world-class research with an engineered systems perspective that integrates materials, devices, processes, components, control algorithms and/or other enabling elements to perform a well-defined function. These systems provide a unique academic research and education experience that involves integrative complexity and technological realization. The complexity of the systems perspective includes the factors associated with its use in industry, society/environment, or the human body.

ERCs enable and foster excellent education, integrate research and education, speed knowledge/technology transfer through partnerships between academe and industry, and prepare a more competitive future workforce. ERCs capitalize on diversity through participation in center activities and demonstrate leadership in the involvement of groups underrepresented in science and engineering.

Centers are required to submit annual reports on progress and plans, which will be used as a basis for performance review and determining the level of continued funding. To support this review and the management of a Center, ERCs also are required to submit management and performance indicators annually to NSF via a data collection website that is managed by a technical assistance contractor. These indicators are both quantitative and descriptive and may include, for example, the characteristics of center personnel and students; sources of cash and in-kind support; expenditures by operational component; characteristics of industrial and/or other sector participation; research activities; education activities; knowledge transfer activities; patents, licenses; publications; degrees granted to students involved in Center activities; descriptions of significant advances and other outcomes of the ERC effort. Such reporting requirements will be included in the cooperative agreement which is binding between the academic institution and the NSF.

Each Center’s annual report will address the following categories of activities: (1) Vision and impact, (2) strategic plan, (3) research program, (4) innovation ecosystem and industrial collaboration, (5) education, (6) infrastructure (leadership, management,

facilities, diversity) and (7) budget issues.

For each of the categories the report will describe overall objectives for the year, progress toward center goals, problems the Center has encountered in making progress towards goals and how they were overcome, plans for the future and anticipated research and other barriers to overcome in the following year, and specific outputs and outcomes.

Use of the Information: The data collected will be used for NSF internal reports, historical data, performance review by peer site visit teams, program level studies and evaluations, and for securing future funding for continued ERC program maintenance and growth.

Estimate of Burden: 150 hours per center for 17 centers for a total of 2,550 hours.

Respondents: Academic institutions.

Estimated Number of Responses per Report: One from each of the 17 ERCs.

Dated: May 28, 2021.

Reports Clearance Officer, National Science Foundation.
