SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On June 21, 2006 (71 FR 35652), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments. Any additional comments on this ICR should be submitted to EPA and OMB within 30 days of this notice.

EPA has established a public docket for this ICR under docket ID number EPA-HQ-OECA-2006-0433, which is available for online viewing at <http://www.regulations.gov>, in person viewing at the Enforcement and Compliance Docket and Information Center in the EPA Docket Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Avenue, NW., Washington, DC. The EPA/DC Public Reading Room is open from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Enforcement and Compliance Docket and Information Center Docket is (202) 566-1514.

Use EPA's electronic docket and comment system at <http://www.regulations.gov>, to submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select "docket search," then key in the docket ID number identified above. Please note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at <http://www.regulations.gov> as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose public disclosure is restricted by statute. For further information about the electronic docket, go to <http://www.regulations.gov>.

Title: NESHP for Plastic Parts and Products Surface Coating (Renewal).

ICR Numbers: EPA ICR Number 2044.03, OMB Control Number 2060-0537.

ICR Status: This ICR is scheduled to expire on January 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of

information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Respondents are owners, or operators of plastic parts and products surface coating operations. Owners, or operators of the affected facilities described must make initial reports when a source becomes subject to the standard, conduct and report on a performance test, demonstrate and report on continuous monitor performance, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility. Semiannual reports of excess emissions are required. These notifications, reports, and records are essential in determining compliance and are required, in general, of all sources subject to National Emission Standards for Hazardous Air Pollutants (NESHAP). Any owner, or operator subject to the provisions of this part shall maintain a file of these measurements and retain the file for at least five years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state, or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An agency may not conduct, or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 77 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the

existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners or operators of plastic parts and products surface coating operations.

Estimated Number of Respondents:

828.

Frequency of Response: Initially, Semiannually, On Occasion.

Estimated Total Annual Hour Burden: 321,393.

Estimated Total Annual Cost: \$ 27,220,752, includes \$16,000 capital/startup costs and \$248,400 annualized O&M costs.

Changes in the Estimates: There is an increase of 278,860 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. The increase in burden reflects the need for facilities to be in compliance with the rule requirements prior to the date of this ICR, and a revision in the number of facilities subject to the NESHP. The increase in Operations and Maintenance cost is due to installation and maintenance of equipment used to verify compliance with the rule requirements.

Dated: January 12, 2007.

Director, Collection Strategies Division.

Title: NESHAP for the Iron and Steel Foundries (Renewal).

ICR Numbers: EPA ICR Number 2096.03, OMB Control Number 2060-0543.

ICR Status: This ICR is scheduled to expire on January 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Iron and Steel Foundries (40 CFR part 63, subpart EEEEE) were proposed on December 12, 2002, (67 *FR* 78274), and promulgated on April 22, 2004, (69 *FR* 21905). The final rule was amended on May 20, 2005 (70 *FR* 29400). Entities potentially affected by this rule are owners or operators of new and existing iron and steel foundries that are major sources of hazardous air pollutant (HAP) emissions. The rule applies to emissions from metal melting furnaces, scrap preheaters, pouring areas, pouring stations, automated conveyor and pallet cooling lines, automated shakeout lines, and mold and core making lines, and fugitive emissions from foundry operations. This information is being collected to assure compliance with 40 CFR part 63, subpart EEEEE.

Owners or operators of the affected facilities described must make one-time-only notifications including: Notification of any physical or operational change to an existing facility

which may increase the regulated pollutant emission rate; notification of the initial performance test, including information necessary to determine the conditions of the performance test; and performance test measurements and results. All reports are sent to the delegated State or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. Owners or operators must maintain records of initial and subsequent compliance tests for lead compounds, and identify the date, time, cause, and corrective actions taken for all bag leak detection alarms. Records of continuous monitoring devices, including parametric monitoring, must be maintained and reported semiannually. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the records for at least five years following the date of such measurements and records. At a minimum, records of the previous two years must be maintained on site.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 151 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of iron and steel foundries.

Estimated Number of Respondents: 98.

Frequency of Response: Initially, on occasion, and semiannually.

Estimated Total Annual Hour Burden: 29,747 hours.

Estimated Costs: \$2,919,524, which includes \$0 annualized Capital Startup costs, \$400,060 annualized Operating & Maintenance Costs (O&M), and \$2,519,464 annualized Labor Costs.

Changes in the Estimates: The increase in burden of 7,422 hours from the most recently approved ICR is due primarily to the inclusion of burden associated with existing sources commencing to conduct periodic scrap inspections and submitting periodic compliance reports. The burden associated with these activities has offset any burden associated with sources complying with the initial rule requirements (i.e., install the required emissions control and monitoring equipment, conduct initial performance tests, prepare the required written plans, and provide the one-time notifications), which was the basis for the burden calculation in the previous ICR.

The increase of \$127,460 in the total annualized cost is primarily due to an increase on the burden associated with operations and maintenance (O&M) of monitors. The O&M costs in the renewal of this ICR renewal has offset the capital costs associated with installation of the necessary monitoring equipment, which was the basis of the total annualized cost calculation in the previous ICR.

Child-Specific Exposure Factors Handbook

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Re-opening of Public Comment Period.

SUMMARY: EPA is re-opening the public comment period for the draft document titled, "Child-Specific Exposure Factors Handbook" (EPA/600/R-06/096A). The document was prepared by the National Center for Environmental Assessment within EPA's Office of Research and Development.

On October 6, 2006, EPA published a **Federal Register** notice (71 FR 59107) announcing a 60-day public comment period that ended December 5, 2006. EPA is re-opening the public comment period for an additional 30 days in response to requests to extend the comment period.
