

Administration determined that USVI met all of the criteria of the section necessary to qualify for the waiver of the additional credit reduction. Therefore employers in USVI will have no additional credit reduction applied for calendar year 2021. However, as a result of USVI having outstanding advances on each January 1 from 2010 through 2021, and an outstanding balance on November 10, 2021, employers in USVI are subject to a FUTA credit reduction of 3.3 percent in 2021.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, part 73 of title 10 of the *Code of Federal Regulations* (10 CFR) “Physical Protection of Plants and Materials.” The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on June 24, 2021, (86 FR 33382).

1. *The title of the information collection:* 10 CFR part 73 “Physical Protection of Plants and Materials.”

2. *OMB approval number:* 3150–0002.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* N/A.

5. *How often the collection is required or requested:* Once for the initial submittal of Cyber Security Plans, Physical Security Plans, Safeguards Contingency Plans, and Security Training and Qualification Plans and then on occasion when changes are made. Required reports are submitted and evaluated as events occur.

6. *Who will be required or asked to respond:* Nuclear power reactor

licensees licensed under 10 CFR parts 50 or 52 who possess, use, import, export, transport, or deliver to a carrier for transport, special nuclear material; actively decommissioning reactor licensees; Category I, Category II and Category III fuel facilities; nonpower reactors (research and test reactors); and other entities who mark and handle Safeguards Information.

7. *The estimated number of annual responses:* 130,968 (40,889 reporting responses + 89,869 third party disclosure responses + 210 record keepers).

8. *The estimated number of annual respondents:* 210 (56 power reactors + 20 decommissioning reactor facilities + 2 Category I fuel facilities + 5 Category II and III fuel facilities + 31 nonpower reactors + and 96 other entities who mark and handle Safeguards Information).

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 495,892 hours (22,631 reporting + 451,788 recordkeeping + 21,473 third party disclosure).

10. *Abstract:* The NRC regulations in 10 CFR part 73 prescribe requirements to establish and maintain a physical protection system and security organization with capabilities for protection of: (1) Special Nuclear Material (SNM) at fixed sites, (2) SNM in transit, and (3) plants in which SNM is used. 10 CFR part 73 contains reporting and recordkeeping requirements which are necessary to help ensure that an adequate level of protection is provided for nuclear facilities and nuclear material, such as: Development and maintenance of security documents including a physical security plan, a training and qualification plan, a safeguards contingency plan, a cyber security plan, and security implementing procedures; notifications to the NRC regarding safeguards and cyber security events; notifications to State governors and Tribes regarding shipments of irradiated reactor fuel; and requirements for conducting criminal history records checks of individuals granted unescorted access to a nuclear power facility, a non-power reactor, or access to Safeguards Information. The objective is to ensure that activities involving SNM are consistent with interests of common defense and security and that these activities do not constitute an unreasonable risk to public health and safety. The information in the reports and records submitted by licensees is used by the NRC staff to ensure that the health and safety of the public and the environment are protected, and licensee

possession and use of SNM is in compliance with license and regulatory requirements.
