Section 73.623 (c) requires applicants to submit a technical showing to establish that their proposed facilities will not result in additional interference to TV broadcast and Digital TV (DTV) operations. The Commission permits broadcasters to agree to proposed DTV facilities that do not conform to the initial allotment parameters, even though they might be affected by potential new interference. The Commission will consider granting applications on the basis of interference agreements if it finds that such grants will serve the public interest. These agreements must be signed by all parties to the agreement. In addition, the Commission needs the following information to enable such public interest determinations: a list of parties predicted to receive additional interference from the proposed facility; a showing as to why a grant based on the agreements would serve the public interest; and technical studies depicting the additional interference. The technical showings and interference agreements will be used by FCC staff to determine if the public interest would be served by the grant of the application and to ensure that the proposed facilities will not result in additional interference.

The technical showings and interference agreements will be used by FCC staff to determine if the public interest will be served by the grant of the application and to ensure that the proposed DTV broadcast facilities will not result in additional interference to existing TV and DTV broadcast facilities' operations and earlier filed applications for new or modified DTV facilities.
