Since the tailrace of the upper development discharges directly into the lower development's reservoir, no minimum flow is proposed for the upper development.

What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who are to respond, including through the

use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Docket ID No. EPA-HQ-OAR-2009-0865.

Affected entities: Entities potentially affected by this action are randomly selected U.S. citizens. Some screening may be done to ensure that the respondents may have some familiarity with fuel economy and fuel economy labels. For example, respondents could be randomly selected from records of people who have recently purchased a vehicle.

Title: Focus Group and Consumer Survey Research for Improving Fuel Economy Label Design and Content.

ICR numbers: EPA ICR No. 2343.01, OMB Control No. 2060-NEW.

ICR status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR

part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA is responsible for developing the fuel economy labels that are posted on window stickers of all new light duty cars and trucks sold in the U.S. and, beginning with the 2011 model year, on all new medium-duty passenger vehicles (a category that includes large sport-utility vehicles and passenger vans). In 2006 EPA updated how the city and highway fuel economy values are calculated, to better reflect typical real-world driving patterns and provide more realistic fuel economy estimates. Since then, increasing market penetration of advanced technology vehicles, in particular plug-in hybrid electric vehicles and electric vehicles, will require new metrics to effectively convey information to consumers. This action will amend the way in which fuel economy estimates are calculated and/or displayed. EPA plans to conduct a limited set of voluntary focus groups and consumer surveys over the course of the rulemaking to solicit information from a diverse group of consumers regarding what information displayed on the fuel economy label will best serve the intended purpose of providing consumers with useful and meaningful information about the vehicles they are considering to purchase. Participation in surveys and focus groups is strictly voluntary. Focus group participants will be compensated, and incentives will be offered for participation in consumer surveys. Resulting reports from the consumer research will not be considered confidential. The identity of individual participants will be strictly confidential.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 30 minutes per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to

respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 8,520.

Frequency of response: Annual.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 4,140 hours.

Estimated total annual burden costs: \$121,300.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: November 24, 2009.

Director, Office of Transportation and Air Quality.
