Appendix—Scope of the Orders

The merchandise covered by these orders is all grades of liquid or aqueous acetone. Acetone is also known under the International Union of Pure and Applied Chemistry (IUPAC) name propan-2-one. In addition to the IUPAC name, acetone is also referred to as β -ketopropane (or beta-ketopropane), ketone propane, methyl ketone, dimethyl ketone, DMK, dimethyl carbonyl, propanone, 2-propanone, dimethyl formaldehyde, pyroacetic acid, pyroacetic ether, and pyroacetic spirit. Acetone is an isomer of the chemical formula C_3H_6O , with a specific molecular formula of CH_3COCH_3 or $(CH_3)_2CO$.

The scope covers both pure acetone (with or without impurities) and acetone that is combined or mixed with other products, including, but not limited to, isopropyl alcohol, benzene, diethyl ether, methanol, chloroform, and ethanol. Acetone that has been combined with other products is included within the scope, regardless of whether the combining occurs in third countries.

The scope also includes acetone that is commingled with acetone from sources not subject to these orders.

For combined and commingled products, only the acetone component is covered by the scope of these orders. However, when acetone is combined with acetone components from sources not subject to this investigation, those third country acetone components may still be subject to other acetone orders.

Notwithstanding the foregoing language, an acetone combination or mixture that is transformed through a chemical reaction into another product, such that, for example, the acetone can no longer be separated from the other products through a distillation process (e.g., methyl methacrylate (MMA) or Bisphenol A (BPA)), is excluded from these orders.

A combination or mixture is excluded from these orders if the total acetone component (regardless of the source or sources) comprises less than 5 percent of the combination or mixture, on a dry weight basis.

The Chemical Abstracts Service (CAS) registry number for acetone is 67–64–1.

The merchandise covered by these orders is currently classifiable under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 2914.11.1000 and 2914.11.5000. Combinations or mixtures of acetone may enter under subheadings in Chapter 38 of the HTSUS, including, but not limited to, those under heading 3814.00.1000, 3814.00.2000, 3814.00.5010, and 3814.00.5090. The list of items found under these HTSUS subheadings is non-exhaustive. Although these HTSUS subheadings and CAS registry number are provided for convenience and customs purposes, the written description of the scope of these orders is dispositive.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP20-49-000]

Transcontinental Gas Pipe Line Company, LLC; Notice of Schedule for Environmental Review of a Proposed Amendment of the Northeast Supply Enhancement Project

On January 31, 2020, Transcontinental Pipe Line Company, LLC (Transco) filed an application in Docket No. CP20-49-000 requesting to amend the Certificate of Public Convenience and Necessity granted by the Federal Energy Regulatory Commission (Commission or FERC) for the Northeast Supply Enhancement Project on May 3, 2019, in Docket No. CP17-101-000. Transco's proposed amendment involves utilizing an alternative road for permanent access to Compressor Station 206 in Somerset County, New Jersey, rather than constructing the previously approved access road to the site.

On February 5, 2020, the Commission issued its Notice of Application for the proposed amendment. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's environmental document for the project. This instant notice identifies the FERC staff's planned schedule for the completion of an Environmental Assessment (EA) for the proposed amendment.

Schedule for Environmental Review

Issuance of EA—May 15, 2020
90-day Federal Authorization Decision

Deadline—August 13, 2020

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of project progress.

Project Description

Transco proposes to amend the Northeast Supply Enhancement Project to utilize an alternative permanent access road to Compressor Station 206 (referred to as the Higgins Farm Access Road) that would involve the use and extension of an existing road rather than construction of the previously approved access road across property owned by Trap Rock Industries (referred to as the Trap Rock Access Road). Transco states the proposal would enable it to comply with requirements from the New Jersey Department of Environmental Protection
