

methods, including public notices in local newspapers and a notice in the **Federal Register** (77 FR 26569, May 4, 2012). We held a public meeting to solicit comments on the Draft EIS/EIR on May 30, 2012. We identified and analyzed four alternatives in the Draft EIS/EIR.

Following public review of the Draft EIS/EIR, the Service and CDFW, in coordination with PCGID-PID, River Partners, and the design engineers, identified the preferred alternative, which includes installation of traditional riprap on the northwest bank of the Riparian Sanctuary, including a low berm along the gravel bar and a toe trench just off the gravel bar; removal of upstream rock; and site-specific plantings on the Riparian Sanctuary. A notice of availability of the Final EIS/EIR was published in the **Federal Register** on March 15, 2013. The record of decision documents our decision to support the implementation of the preferred alternative described in the Final EIS/EIR.

We provide this notice under regulations in the Code of Federal Regulations for implementing the National Environmental Policy Act (40 CFR 1506.6).

Parties interested in leasing and development of Federal coal in the planning area should provide coal resource data for their area(s) of interest. Specifically, information is requested on the location, quality, and quantity of Federal coal with development potential, and on surface resource values related to the 20 coal unsuitability criteria described in 43 CFR part 3461. This information will be used for any necessary updating of coal screening determination (43 CFR 3420.1–4) in the Decision Area and in the environmental analysis for the RMP. In addition to coal resource data, the BLM seeks resource information and data for other public land values (e.g., air quality, cultural and historic resources, fire/fuels, fisheries, forestry, lands and realty, non-energy minerals and geology, oil and gas, paleontology, rangeland management, recreation, soil, water, and wildlife) in the planning area. The purpose of this request is to assure that the planning effort has sufficient information and data to consider a reasonable range of resource uses, management options, and alternatives for the public lands.

The BLM will use an interdisciplinary approach to develop the plan in order to consider the variety of resource issues and concerns identified. Specialists with expertise in the following disciplines will be involved in the planning process: Minerals and geology, archaeology, wildlife and fisheries, lands and realty, hydrology, soils,

livestock grazing, recreation, sociology, and economics.
