#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The Census Bureau plans to request clearance for the collection of data concerning the November 2013 Email Address Collection Test Supplement. The Census Bureau and the Bureau of Labor Statistics (BLS) sponsor the CPS which has been conducted for over 70 years.

The Current Population Survey (CPS) has been collecting data on household employment for decades. Through the years, it has made survey improvements to keep the data quality and survey response rates high. Over the last few years, CPS, like many surveys, has seen response rates declining slowly. A review of paradata has found one of the main reasons for this decline is not just refusals but also respondent avoidance (i.e. the interviewers are unable to make contact with the respondent). This has led to an effort to think of new ways to contact respondents and reduce respondent burden so that they may be more likely to answer CPS over the many months needed.

One of the solutions recommended has been to research the possibility of using the Internet as a data collection mode as well as a tool to help increase response rates. We foresee that in the future, we could collect email addresses from our respondents. For those that are eligible, we could then send an email to the respondent with a secure link in order for that respondent to complete the CPS the next month over the internet and in turn, keep up response rates while lowering costs of interviewing. Internet is not limited to just a survey data collection mode. These emails could be used for other contacts as well. We could allow the respondent to set up a time to meet with the interviewer at their convenience and

save on travel costs associated with the multiple personal visits. The email could also be as simple as a “Thank You” with information that lets respondents know their participation is improving the quality of our data.

This supplement is the first step in the review of the feasibility of this plan. It will test the ability of collecting email addresses and collecting interest in being contacted by email or answering the survey through the internet for possible future enhancements to CPS.

##### II. Method of Collection

The email address collection will be collected by both personal visit and telephone interviews in conjunction with the regular November CPS interviewing. All interviews are conducted using computer-assisted interviewing.
