

management of new conservation reserves. The County would not execute conservation easements on working agricultural lands, or include the enhancement of existing conservation reserves in the mitigation strategy. Under this alternative, the network of conservation lands would be slightly smaller.

Decision and Rationale for Decision

We have made the determination that the applicant's proposed HCP, as modified by the terms and conditions of the ITP, would meet the statutory ITP issuance criteria set forth in section 10(1)(2)(B) (16 U.S.C. 1539(a)(2)(B)). Our assessment of the application was conducted in accordance with the requirements of section 10(a)(1)(B) of the ESA and its implementing regulations. Based on our review of the alternatives and their environmental consequences as described in the final EIS, we selected the proposed action because implementation of the final HCP and issuance of the ITP best fulfills the Service's statutory mission and responsibilities while meeting our purpose and need. This decision is described further in the ROD.

Authority

We provide this notice in accordance with the requirements of NEPA (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1506.6).

Nanette Seto,

Acting Deputy Regional Director, Pacific Region 1, U.S. Fish and Wildlife Service.
