band reconfiguration process is being overseen by a Transition Administrator (TA) which has provided the Commission with a plan detailing when band reconfiguration will commence in each of the fifty-five 800 MHz National Public Safety Planning Advisory Committee (NPSPAC) regions. On March 11, 2005, the Bureau approved the TA's basic 800 MHz band reconfiguration schedule, *i.e.,* the grouping of the NPSPAC regions into four waves (Waves 1–4) and starting the reconfiguration process in each wave on the dates recommended by the TA.

2. In a public notice released on May 27, 2005, the Commission announced that the 800 MHz band reconfiguration process for non-NPSPAC channels will start June 27, 2005, in the NPSPAC regions assigned to Wave 1. A list of NPSPAC regions assigned to Wave 1 is attached to this notice. Therefore, the three-month period during which non-NPSPAC 800 MHz licensees have the option of negotiating on a voluntary basis will end September 26, 2005, followed by a the three-month mandatory negotiation period that will end December 26, 2005.

3. The Commission also announced that, effective May 27, 2005, it froze the filing of 800 MHz applications for non-NPSPAC channels in Wave 1. The freeze applies to stations located in either (1) one of the NPSPAC regions assigned to Wave 1 or (2) an adjacent region but within 70 miles of the border of one of the Wave 1 regions. This freeze will last until thirty working days after the date for completion of mandatory negotiations as specified above, *i.e.,* until February 8, 2006. The freeze does not apply to modification applications filed to implement 800 MHz band reconfiguration, modification applications filed that do not change a 800 MHz frequency or expand a 800 MHz station's existing coverage area (*e.g.,* administrative updates), assignments/transfers, or renewal-only applications.

4. The release date of the May 27, 2005 public notice also established the eighteen, thirty and thirty-six month reconfiguration benchmark compliance dates as defined in the *Report and Order* and *Supplemental Order.* Therefore, Nextel Communications, Inc., must (i) relocate all but Nextel and SouthernLINC incumbents from Channels 1–120 in the first twenty NPSPAC regions scheduled for reconfiguration and (ii) initiate retuning negotiations with all NPSPAC licensees in those same regions by December 26, 2006, (eighteen month benchmark) and that all applicable systems must have commenced reconfiguration by December 26, 2007 (thirty month benchmark). The 800 MHz band reconfiguration must be completed by June 26, 2008 (thirty-six month benchmark).

5. To facilitate the 800 MHz reconfiguration process, the Commission has established the following new radio service codes for licenses that list 800 MHz band frequencies governed by part 90 of the Commission's Rules:

Site specific licenses:

• Public safety (conventional)—GE
• Public safety (trunked)—YE
• Business/Industrial/Land Transportation (conventional)—GJ
• Business/Industrial/Land Transportation (trunked)—YJ
• SMR (conventional)—GM and GL (The GL code is used only for applications listing both 800 MHz and 900 MHz frequencies)
• SMR (trunked)—YM and YL (The YL code is used only for applications listing both 800 MHz and 900 MHz frequencies)

Geographic area licenses:

• SMR, market area—YH and CY (The CY code is used only for applications listing both 800 MHz and 1.9 GHz frequencies)

6. The Commission's Universal Licensing System (ULS) will automatically update modification applications filed to implement 800 MHz band reconfiguration to show the appropriate new radio service code (*i.e.,* applicants should file using their current radio service codes). Once the radio service code has been changed on the license by the Commission, licensees filing subsequent applications concerning that license must use the new radio service code.

7. The Reconfiguration Plan filed by the TA is available on the Commission's 800 MHz band reconfiguration Web page at *http://www.800MHz.gov.* Questions concerning the plan, and other Transition Administrator matters, including whether your 800 MHz system must be relocated, should be directed to Brett Haan, BearingPoint, 1676 International Drive, McLean, VA 22102, *Brett.Haan@800ta.org.*
