k. This application has been accepted for filing and is now ready for environmental analysis.

l. *Project Description:* The proposed project would utilize water diverted from the Snake River at an existing diversion dam located 10 miles upstream of Idaho Falls. Currently the diversion dam diverts irrigation water for agricultural purposes into the existing Idaho Canal on the east side of the river and Great Western Canal on the west side of the river. Under the proposed project, the Districts would enlarge the canals by raising the banks of each by an additional 1 to 3 feet to increase their capacity and then divert up to 1,000 cubic feet per second (cfs) of additional flow into each canal for power generation. On the east side of the Snake River, flows for power generation would be diverted into the Idaho Canal and conveyed about 3.1 miles to a new East Side Powerhouse and then discharged back to the Snake River. On the west side of the Snake River, flows for power generation would be diverted into the Great Western Canal and conveyed about 3.5 miles to a new West Side Powerhouse and then discharged back to the Snake River. The Districts propose to maintain a 1,000-cfs minimum flow in the 3.5-mile-long segment of the Snake River bypassed by the project whenever the project is operating. The total capacity of both powerhouses would be 2.5 megawatts (MW), with a 1.2–MW capacity for the single Kaplan turbine in the East Side Powerhouse and a 1.3–MW capacity for the single Kaplan turbine in the West Side Powerhouse. The average annual generation is expected to be 18.3 gigawatt-hours. The project would also include two new 12.5-kilovolt transmission lines, extending 2,500 feet and 400 feet from the East Side and West Side Powerhouses, respectively, to the interconnection points with the existing electrical distribution system.

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

**[Project No. 3452-000]**

#### **Erie Boulevard Hydropower, L.P.; Notice of Authorization for Continued Project Operation**

On June 28, 2019, Erie Boulevard Hydropower, L.P., licensee for the Oak Orchard Hydroelectric Project No. 3452, filed an Application for a Subsequent License pursuant to the Federal Power Act (FPA) and the Commission's regulations thereunder. The Oak Orchard Hydroelectric Project is located adjacent to the New York State Canal Corporation's Barge Canal in the Village of Medina, Orleans County, New York.

The license for Project No. 3452 was issued for a period ending June 30, 2021. Section 15(a)(1) of the FPA, 16

U.S.C. 808(a)(1), requires the Commission, at the expiration of a license term, to issue from year-to-year an annual license to the then licensee(s) under the terms and conditions of the prior license until a new license is issued, or the project is otherwise disposed of as provided in section 15 or any other applicable section of the FPA. If the project's prior license waived the applicability of section 15 of the FPA, then, based on section 9(b) of the Administrative Procedure Act, 5 U.S.C. 558(c), and as set forth at 18 CFR 16.21(a), if the licensee of such project has filed an application for a subsequent license, the licensee may continue to operate the project in accordance with the terms and conditions of the license after the minor or minor part license expires, until the Commission acts on its application. If the licensee of such a project has not filed an application for a subsequent license, then it may be required, pursuant to 18 CFR 16.21(b), to continue project operations until the Commission issues someone else a license for the project or otherwise orders disposition of the project.

If the project is subject to section 15 of the FPA, notice is hereby given that an annual license for Project No. 3452 is issued to Erie Boulevard Hydropower, L.P. for a period effective July 1, 2021 through June 30, 2022 or until the issuance of a new license for the project
