

lithography, environmental safety and health, standards, and equipment productivity improvement team projects and manufacturing methods. Also, the nature and objectives of the venture are to perform and sponsor research and development of standards, facilities, software, processes, materials and equipment for advanced semiconductor manufacturing for the benefit of its members and for the industry as a whole. This work is done in conjunction with its members; suppliers of equipment, materials, services and software to the industry; universities; research laboratories and institutes; and government agencies and laboratories. International SEMATECH also sponsors workshops and conferences among industry, academia and government on technical and business challenges facing the semiconductor industry and facilitates the preparation and publication of the International Technology Roadmap for Semiconductors. International SEMATECH further conducts and sponsors efforts to make business processes in the industry more efficient, including creating models of the cost of owning and operating semiconductor equipment and facilities and analysis of larger economic trends in the industry. International SEMATECH provides various services, including wafer processing services, to companies in the industry, including equipment and materials suppliers, to help them research and develop advanced facilities, equipment and materials more quickly and efficiently.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and International SEMATECH intends to file additional written notification disclosing all changes in membership.
