POLICY JUSTIFICATION**Morocco – CH-47D CHINOOK Helicopters**

The Government of Morocco has requested a possible sale of three CH-47D CHINOOK Helicopters with 6 (2 per helicopter) T55-GA-714A Turbine engines, 2 spare T-55-GA-714A Turbine engines, 4 AN/ARC-201E Single Channel Ground and Airborne Radio Systems (SINCGARS), mission equipment, communication and navigation equipment, ground support equipment, spare and repair parts, special tools and test equipment, technical data and publications, site survey, U.S. government and contractor technical and logistics personnel services, and other related elements of logistics support. The estimated cost is \$134 million.

This proposed sale will contribute to the foreign policy and national security objectives of the United States by improving the security of a major Non-NATO ally which has been, and continues to be, an important force for the political stability and economic progress in Africa.

Morocco needs these helicopters to improve its capability to meet current and future needs for humanitarian missions. Delivery of these helicopters will make it a more valuable partner in an increasingly important area of the world.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be The Boeing Company in Philadelphia, PA. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. government or contractor representatives to Morocco.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 09-53

**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act**

**Annex
Item No. vii**

(vii) Sensitivity of Technology:

1. The CH-47D CHINOOK medium lift helicopter is a cargo helicopter, remanufactured from CH-47A, B, and C aircraft. The avionics system in the CH-47D consists of the communications equipment providing high frequency (AN/ARC-220), VHF AM/FM (AN/ARC-186) and UHF-AM (AN/ARC-164) communications. The navigation equipment includes ADF, VOR ILS Marker Beacon (AN/ARN-123), VHF Homing (AN/ARC-201) devices. Transponder equipment (AN/APX-117) consists of a receiver with inputs from the barometric altimeter for altitude encoding.

a. The AN/ARC-201E Single Channel Ground and Airborne Radio System (SINCGARS) is a tactical airborne radio subsystem that provides secure, anti-jam voice and data communication.

b. The AN/APX-117 transponder system provides automatic radar identification of the helicopter. The system receives, decodes, and replies to interrogations on modes 1,2,3/A,4,C and S from all suitable equipped challenging airborne and ground facilities. The receiver operates on 1,300 MHZ and the transmitter section operates on a frequency of 1090MHZ. Because these frequencies are in the UHF band, the operational range is limited to line-of-site.

c. The AN/ARC-186 provides communication in the VHF, AM, and FM bands. Up to 20 channels plus two guard channels can be pre-stored in the set. The set operates on the AM/FM modes, and the frequency AM reception is between 108.00 and 151.975 MHZ. The AM receiver transmits between 116.000 and 151.975 MHZ and FM transmitter receives, with a homing range of 30.000 to 87.975 MHZ.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
