SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The applicant requests a permit to take Weddell seals to assess the nature and underlying mechanisms that contribute to the significant heterogeneity observed in reproductive rates and animal fitness that exist within wild animal populations. This project will take a two-stage approach to understanding the causes of observed differences in reproductive output by comparing high- and low-quality females' energy dynamics, aerobic capacity and dive behavior, and fertility (genetics). To achieve project goals, a cohort of 26 female-pup pairs (13 high-quality, 13 low-quality) in Erebus Bay, Antarctica will undergo health assessments across the austral summer.

Dive recorders will also be deployed during this time, and instruments will be recovered after the winter (gestational) foraging period. An estimated 52 animals may be taken (although additional animals may be sampled if animals do not return to the expected location for recapture) by capture and restraint for drug administration, biological sampling, blood sampling, instrumentation, marking, measuring, ultrasound, and weighing. Up to 36,100 Weddell seals may also be taken by harassment through counting surveys, collection of molt, scat, spew, urine, and unmanned aircraft systems for photogrammetry. Samples collected during research and salvaged from carcasses may be imported or exported. Up to five mortalities of Weddell seal females and five Weddell seal pups are requested annually, not to exceed 15 mortalities across the duration of the permit. Up to 20 crabeater seals (*Lobodon carcinophagus*) may also be incidentally harassed during research activities.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: February 21, 2020.

Chief, Permits and Conservation Division,
