SUPPLEMENTARY INFORMATION:

Overview: The growth in scale, diversity, and complexity of data has increased the demand for understanding large amounts of heterogeneous data. This presents new challenges to the way data and information are used and managed. A need exists to understand ways to design systems for processing big data, develop sophisticated analytics using large-scale data, consider privacy issues arising from use of this massive data, and determine ways to teach big data analytics across disciplines. This workshop will bring together academic and industry leaders across disciplines to further inform the development of an effective Federal Big Data Research Agenda.

Background: Given the large number of overlapping data challenges many federal agencies are facing, a National Big Data R&D Initiative was launched in March 2012. As part of this Initiative, a Federal Big Data Research Agenda is under development. This workshop is part of the process to collect input from those in academia and industry that are working on big data research and new technologies.

The purpose of drafting a Federal Big Data Research Agenda is to assist Federal Agencies in planning their individual Big Data R&D programs and initiatives. The Agenda is expected to be released in late 2015.

Submitted by the National Science Foundation for the National Coordination Office (NCO) for Networking and Information Technology Research and Development (NITRD) on January 22, 2015.

The Commission plans to submit this proposed collection of information to the Office of Management and Budget for approval.

The Commission is required under Section 342 of the Dodd Frank Wall Street and Reform Act to develop standards and processes for ensuring the fair inclusion of women-owned and minority-owned businesses in all of the Commission's business activities. The effort to implement this mandate includes the development of a new electronic Supplier Diversity Business Management System (the System) to collect up-to-date business information and capabilities statements from diverse suppliers interested in doing business with the Commission. This information will allow the Commission to update and more effectively manage its current internal repository. It will also allow the

Commission to measure the effectiveness of its technical assistance and outreach efforts, and target areas where additional program efforts are necessary.

The Commission invites comment on the System. Information will be collected in the System via web-based, e-filed, dynamic form-based technology. The company point of contact will complete a profile consisting of basic contact data and information on the capabilities of the business. The profile will include a series of questions, some of which are based on the data that the individual enters. Drop-down lists will be included where appropriate to increase ease of use.

The information collection is voluntary. The System is scheduled to be released in May 2015. There are no costs associated with this collection. The public interface to the System will be available via a web-link provided by the agency.

Estimated number of annual responses = 500

Estimated annual reporting burden = 250 hours (30 minutes per submission)

Written comments are invited on: (a) Whether this collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden imposed by the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication. Please direct your written comments to Pamela Dyson, Acting Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington DC, 20549 or send an email to: PRA_Mailbox@sec.gov.
