

who did not participate in the IFPS II. All IFPS II participants who completed at least two surveys after their infants were born and for whom current contact information can be found will be sent the mailed questionnaire. This is expected to be about 2,562 participants. We estimate that 1,538 respondents will return it and that it will take a

respondent 20 minutes (0.33 hours) to complete the questionnaire, for a total of 513 hours. An additional 522 mothers are expected to complete the telephone interview of 20 minutes (0.33 hours) for a total of 174 hours. An estimated 1,380 participants will return the demographic questionnaire, which will require 5 minutes (0.08 hours) to

complete for a total of 110 hours. Thus, the total estimated burden is 839 hours. FDA's burden estimate is based on prior experience with consumer surveys that are similar to this proposed data collection.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN¹

Portion of study	No. of respondents	Annual frequency per response	Total annual responses	Hours per response	Total hours
Pretest mailed questionnaire	91	1	91	0.42	38
Pretest telephone interview	9	1	9	0.42	4
Main study mailed questionnaire	1,538	1	1,538	0.33	513
Main study telephone interview	522	1	522	0.33	174
Demographic questionnaire	1,380	1	1,380	0.08	110
Total					839
