B. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through [regulations.gov](http://www.regulations.gov) or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).

- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns and suggest alternatives.
- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- viii. Make sure to submit your comments by the comment period deadline identified.

II. Background

A. What Action is the Agency Taking?

Under section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is reevaluating existing pesticides to ensure that they meet current scientific and regulatory standards. Using a modified, streamlined version of its public participation process, EPA has completed a RED and an Amendment for the low-risk naphthalene acetate pesticides under section 4(g)(2)(A) of FIFRA. The naphthalene acetates are plant growth regulators that mimic the function of the naturally occurring plant growth hormone, auxin. They are mainly used on apple and pear trees but also have minor uses on crops such as olives and cherries. They are also used on a wide variety of ornamental plants, trees, and shrubs. In its various forms, NAA can stimulate root growth, thin excess fruit, and prevent premature fruit drop. EPA has determined that the database to support reregistration is substantially complete and that products containing naphthalene acetic acid, its salts, ester, and acetamide will be eligible for reregistration provided the risks are mitigated either in the manner described in the RED Amendment or by another means that achieves equivalent risk reduction. Upon submission of any required product specific data under section

4(g)(2)(B) of FIFRA and any necessary changes to the registration and labeling (either to address any concerns identified in the RED Amendment or as a result of product specific data), EPA will make a final reregistration decision under section 4(g)(2)(C) of FIFRA for products containing naphthalene acetates.

With the May 26, 2004 RED signature, EPA concluded that the use of the naphthalene acetates would have no effect on any endangered or threatened species or their critical habitat from the uses currently registered based on its screening-level assessment. However, the Agency was informed that one very minor use, on olive trees as a chemical thinning agent, has an approved application rate higher than assessed in the RED. Based on screening-level ecological and occupational assessments of the higher use rate, calculated risk quotients (RQs) for NAA use on olive trees then exceeded the level of concern for endangered species and one worker exposure scenario exceeds the occupational level of concern. The Agency performed a refined risk assessment with additional data, which allowed EPA to characterize the risks and determine that risks were at an acceptable level. The Agency is issuing an Amended RED for NAA, which reflects the refined occupational and ecological assessments.

In addition, certain components of the document, which did not affect the final regulatory decision, were undergoing final editing at the time of the RED's signature. These components, including the list of additional generic data requirements, summary of labeling changes, appendices, and other relevant information, have been added to the naphthalene acetic acid, its salts, ester, and acetamide RED Amendment document. Subsequent to signature, EPA identified some minor errors and ambiguities in the original RED. Therefore, for the sake of accuracy, the Agency also has included the appropriate error corrections and clarifications to the RED Amendment. None of these additions or changes impacts the decisions described in the NAA RED or its Amendment. These changes are described in the preamble to the naphthalene acetic acid, its salts, ester, and acetamide RED Amendment.

EPA is applying the principles of public participation to all pesticides undergoing reregistration and tolerance reassessment. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the **Federal Register** on May 14, 2004, (69 FR 26819) (FRL-7357-9) explains that in

conducting these programs, the Agency is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of issues, and degree of public concern associated with each pesticide. EPA can expeditiously reach decisions for pesticides like the naphthalene acetates, which pose few risk concerns, and require little risk mitigation. Once EPA assesses uses and risks for such low risk pesticides, the Agency may go directly to a decision and prepare a document summarizing its findings, such as the naphthalene acetic acid, its salts, ester, and acetamide RED and its Amendment.

The reregistration program is being conducted under congressionally mandated timeframes, and EPA recognizes the need both to make timely decisions and to involve the public in finding ways to effectively mitigate pesticide risks. NAA, however, poses few risks that require mitigation. The Agency therefore is issuing the naphthalene acetic acid, its salts, ester, and acetamide RED and Amendment, its risk assessments, and related support materials simultaneously for public comment. The comment period is intended to provide an opportunity for public input and a mechanism for initiating any additional amendments to the RED. All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. These comments will become part of the Agency Docket for naphthalene acetic acid, its salts, ester, and acetamide. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

EPA will carefully consider all comments received by the closing date and will provide a Response to Comments Memorandum in the Docket and regulations.gov. If any comment significantly affects the document, EPA also will publish an amendment to the RED in the **Federal Register**. In the absence of substantive comments requiring changes, the naphthalene acetic acid, its salts, ester, and acetamide RED as amended will be implemented as it is now presented.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA, as amended, directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product specific data on individual end-use products and either reregistering

products or taking other "appropriate regulatory action."
