FFP Project 42 LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On February 1, 2011, FFP Project 42 LLC filed an application, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of hydropower on the Mississippi River, near Memphis, in Shelby County, Tennessee and near West Memphis, in Crittenden County Arkansas. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Hope Field Point hydrokinetic project would consist of the following: (1) Up to 5,600 SmarTurbine generating units installed in arrays on the bottom of the river; (2) the total capacity of the installation would be up to 224,000 kilowatts; (3) flexible cables would convey each array's power to a metering station; and (4) a transmission line would interconnect with the power grid. The proposed project would have an average annual generation of 490,560,000 kilowatt-hours (kWh), which would be sold to a local utility.

Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On February 1, 2011, FFP Project 45 LLC filed an application, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of hydropower on the Mississippi River, in Mississippi County, Arkansas and Dyer County Tennessee. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Huffman Light hydrokinetic project would consist of the following: (1) Up to 1,900 SmarTurbine generating units installed in arrays on the bottom of the river; (2) the total capacity of the installation would be up to 76,000 kilowatts; (3) flexible cables would convey each

array's power to a metering station; and (4) a transmission line would interconnect with the power grid. The proposed project would have an average annual generation of 166,440,000 kilowatt-hours (kWh), which would be sold to a local utility.
