

Elements of this summary report shall include: A description of each process adjustment performed on the SNCR system, a discussion of whether the adjustment affected NO_x emission rate (including CEMS data that may have been recorded while the adjustment was in progress), a description of the range (if applicable) over which the adjustment was examined, and a discussion of how the adjustment will be reflected or accounted for in kiln operating practices. In addition, to the extent that the owner/operator evaluates the impact of varying reagent injection rate on NO_x emissions, the owner/operator shall include the following information: The range of reagent injection rates evaluated (expressed as a molar ratio of reagent to average NO_x concentration), reagent injection rate, average NO_x concentration, lime production rate, kiln flue gas temperature, and the presence of any detached plumes from the kiln exhaust.

(iii) The owner/operator shall submit a report that lists the daily rolling 30-kiln operating day emission rates for NO_x and SO₂, calculated in accordance with paragraphs (i)(6)(iii) and (iv) of this section.

(iv) The owner/operator shall submit a report that lists the monthly rolling 12-month emission rates for NO_x and SO₂, calculated in accordance with paragraphs (i)(6)(v) and (vi) of this section.

(v) The owner/operator shall submit excess emissions reports for NO_x and SO₂ limits. Excess emissions means emissions that exceed any of the emissions limits specified in paragraph (i)(3) of this section. The reports shall include the magnitude, date(s), and duration of each period of excess emissions; specific identification of each period of excess emissions that occurs during startups, shutdowns, and malfunctions of the kiln; the nature and cause of any malfunction (if known); and the corrective action taken or preventative measures adopted.

(vi) The owner/operator shall submit a summary of CEMS operation, to include dates and duration of each period during which the CEMS was inoperative (except for zero and span adjustments and calibration checks), reason(s) why the CEMS was inoperative and steps taken to prevent recurrence, and any CEMS repairs or adjustments.

(vii) The owner/operator shall submit results of all CEMS performance tests required by 40 CFR part 60, Appendix F, Procedure 1 (Relative Accuracy Test Audits, Relative Accuracy Audits, and Cylinder Gas Audits).

(viii) When no excess emissions have occurred or the CEMS has not been inoperative, repaired, or adjusted during the reporting period, the owner/operator shall state such information in the semiannual report.

(9) *Notifications.* All notifications required under this section shall be submitted by the owner/operator to the Director, Enforcement Division (Mail Code ENF-2-1), U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, California 94105-3901.

(i) The owner/operator shall submit notification of commencement of construction of any equipment which is being constructed to comply with the NO_x emission limits in paragraph (i)(3) of this section.

(ii) The owner/operator shall submit semiannual progress reports on construction of any such equipment.

(iii) The owner/operator shall submit notification of initial startup of any such equipment.

(10) *Equipment operations.* (i) At all times, including periods of startup, shutdown, and malfunction, the owner/operator shall, to the extent practicable, maintain and operate the kilns, including associated air pollution control equipment, in a manner consistent with good air pollution control practices for minimizing emissions. Pollution control equipment shall be designed and capable of operating properly to minimize emissions during all expected operating conditions. Determination of whether acceptable operating and maintenance procedures are being used will be based on information available to the Regional Administrator, which may include, but is not limited to, monitoring results, review of operating and maintenance procedures, and inspection of the kilns.

(ii) After completion of installation of ammonia injection on a kiln, the owner/operator shall inject sufficient ammonia to achieve compliance with the NO_x emission limits from paragraph (i)(3) of this section for that kiln while preventing excessive ammonia emissions.

(11) *Enforcement.* Notwithstanding any other provision in this implementation plan, any credible evidence or information relevant as to whether the kiln would have been in compliance with applicable requirements if the appropriate performance or compliance test had been performed can be used to establish whether or not the owner/operator has violated or is in violation of any

standard or applicable emission limit in the plan.

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Advanced notice of proposed rulemaking; request for information.

SUMMARY: We, the National Marine Fisheries Service (NMFS), are considering proposing protective regulations to provide for the conservation of the 20 coral species recently listed as threatened under the Endangered Species Act (ESA). Fifteen of the listed species occur in the Indo-Pacific and five occur in the Caribbean. This advanced notice of proposed rulemaking (ANPR) is intended to alert other agencies and the public of our planning efforts and request public input that will assist in identifying actions and activities that may impact the status of these corals, as well as information on the existence and efficacy of on-going conservation activities. This information will help inform our evaluation of what, if any, protective regulations are necessary and advisable for the conservation of these species.

DATES: Responses to this request for information must be received by March 16, 2015.

SUPPLEMENTARY INFORMATION:

Background

On September 10, 2014, we published a final rule listing 20 species of coral as threatened under the ESA (79 FR 53851). The 15 Indo-Pacific species include *Acropora globiceps*, *Acropora jacquelineae*, *Acropora lokani*, *Acropora pharaonis*, *Acropora retusa*, *Acropora rudis*, *Acropora speciosa*, *Acropora tenella*, *Anacropora spinosa*, *Isopora crateriformis*, *Euphyllia paradivisa*, *Montipora australiensis*, *Porites naporora*, *Pavona diffluens*, and *Seriatopora aculeata*. The five Caribbean species include *Dendrogyra cylindrus*, *Orbicella annularis*, *Orbicella faveolata*, *Orbicella franksi*, and *Mycetophyllia ferox*. The final listing rule describes the background of the listing actions for these 20 corals and provides a summary of our conclusions regarding the statuses of the listed corals. For additional background and a summary of natural history and threats to the species, the reader is referred to the Status Review Report, Supplemental Information Report, and Final Listing Rule (all three are available at http://www.fpir.noaa.gov/PRD/prd_coral.html). At the time of listing we did not propose any protective regulations pursuant to section 4(d) of the ESA.

ESA section 9(a)(1) prohibitions are automatically applied to species listed as endangered but not to species listed as threatened. Section 4(d) of the ESA provides that, whenever a species is listed as threatened, the Secretary of Commerce (Secretary) shall issue such regulations as she deems necessary and advisable to provide for the conservation of the species. Such regulations may include any or all of the prohibitions in ESA section 9(a)(1) that apply automatically to species listed as
