Abstract of Information Available

Human remains representing, at least, one individual have been identified. No associated funerary objects are present. The human remains include a cranium and mandible. They were removed from an unprovenienced prehistoric cemetery on one of the Channel Islands, Santa Barbara County, CA, in the 1930s and subsequently donated or sold to the U.S.C. Dental School. The head of the U.S.C. Dental School later gave them to Dr. J.D. Lowry, a family friend of John Nusser. Dr. Lowry gave Mr. Nusser the cranium and mandible sometime around 1995, when Mr. Nusser was in medical school. Mr. Nusser donated them to the Museum in 2001.

Human remains representing, at least, one individual have been identified. No associated funerary objects are present.

The human remains include an acromion process of a right scapula. The human remains were anonymously mailed to the Museum in an envelope with a postmark of April 17, 2010, sent from Palm Beach Gardens, Florida. Inside the envelope was a handwritten note that read, "This bone fragment along with some beads (that are lost) (??? white) were taken from the Channel Islands Hillsides more than 30 years ago by a relative. I would like to return them to where they belong. I am sure they are Chumash origin. Thank you." No other information was provided.
