

voltage circuits serving portable or mobile three-phase alternating current equipment; circuit breakers) to its Beulah Mine (I.D. No. 32-00043) located in Mercer County, Montana. The petitioner requests a modification of the standard to permit start-up of the electric water pumps in the pit area when there is undervoltage or loss of power to the pump box. The petitioner proposes to: (i) Use automatic resetting circuit breakers that meet the requirement of the existing standard and that would reset only after trips that are caused by undervoltage; (ii) have a qualified person record examinations and make records available for inspection upon request by interested parties; (iii) provide electrical training to all affected mining personnel before the system is put in operation, record this training and make it available for inspection at all times; (iv) obtain undervoltage release by the undervoltage unit and use a normal closed relay in combination with a capacitor trip unit to open the breaker; and (v) post visible signs at the pump controller and at the pumps, warning of automatic restart of the pumps. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

12. Excel Mining, LLC

[Docket No. M-2001-025-C]

Excel Mining, LLC, HC 67, Box 615, Pilgrim, Kentucky 41250 has filed a petition to modify the application of 30 CFR 75.503 (permissible electric face equipment; maintenance) and 30 CFR 18.41(f) (plug and receptacle-type connectors) to its Mine No. 2 (I.D. No. 15-09571) located in Martin County, Kentucky, and its Mine No. 3 (I.D. No. 15-08079) located in Pike County, Kentucky. The petitioner proposes to use a permanently installed locking screw threaded through a steel bracket or spring-loaded locking devices in lieu of padlocks on battery plugs for powering permissible underground mining equipment. This is to prevent the threaded rings securing the battery plugs to the battery receptacles from unintentional loosening. Warning tags stating "Do Not Disengage Plugs Under Load" will be placed on all battery connectors on the battery-powered equipment. The petitioner states that all personnel who operate and maintain the battery-powered mobile equipment would receive training before implementation of its alternative method. The petitioner asserts that the proposed alternative method would

provide at least the same measure of protection as the existing standard.

Request for Comments

Persons interested in these petitions are encouraged to submit comments via e-mail to "comments@msha.gov," or on a computer disk along with an original hard copy to the Office of Standards, Regulations, and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Room 627, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before June 25, 2001. Copies of these petitions are available for inspection at that address.

Dated at Arlington, Virginia this 2nd day of May 2001.

David L. Meyer,

Director, Office of Standards, Regulations, and Variances.
