

HHS will match the tenant records included in HUD/H-11 and HUD/PIH-4 to NDNH records contained in HHS' "Location and Collection System of Records," No. 09-90-0074. HUD will place the resulting matched data into its Enterprise Income Verification (EIV) system (HUD/PIH-5). The notice for this system was published at 72 FR 17589. Routine uses of records maintained in the system, including categories of users and purposes of such uses was published in that Notice.

V. Period of the Match

The computer matching program will be conducted according to agreements between HUD and HHS. The computer matching agreement for the planned match will terminate either when the purpose of the computer matching program is accomplished, or 18 months from the date the agreement is signed, whichever comes first. The agreements may be extended for one 12-month period, with the mutual agreement of all involved parties, if the following conditions are met:

(1) Within three months of the expiration date, all Data Integrity Boards (DIBs) review the agreement, find that the program will be conducted without change, and find a continued favorable examination of benefit/cost results; and (2) All parties certify that the program has been conducted in compliance with the agreement.

The agreement may be terminated, prior to accomplishment of the computer matching purpose or 18 months from the date the agreement is signed (whichever comes first), by the mutual agreement of all involved parties within 30 days of written notice.

SUPPLEMENTARY INFORMATION:

I. Abstract

This IC implements the requirements of the Endangered Species Act (16 U.S.C. 1539). There are no corresponding Service regulations for the ESA's post-delisting monitoring requirement. This IC also implements the Migratory Bird Treaty Act (16 U.S.C. 704) contained in Service regulations in Chapter I, Subchapter B of Title 50 of the Code of Federal Regulations (CFR).

The American peregrine falcon was removed from the List of Endangered and Threatened Wildlife on August 25, 1999. Section 4(g) of the Endangered Species Act (ESA) requires that all species that are recovered and removed from the List of Endangered and Threatened Wildlife (delisted) be monitored in cooperation with the States for a period of not less than 5 years. The purpose of this requirement is to detect any failure of a recovered species to sustain itself without the protections of the ESA. We work with relevant State agencies and other species experts to develop appropriate plans and procedures for systematically monitoring recovered wildlife and plants.

The American peregrine falcon has a large geographic distribution that includes a substantial amount of non-Federal land. Although the ESA requires that monitoring of recovered species be conducted for not less than 5 years, the life history of American peregrine falcons is such that it is appropriate to monitor this species for a longer period of time in order to meaningfully evaluate whether or not the recovered species continues to maintain its recovered status. The Monitoring Plan for the American Peregrine Falcon is available on our website at <http://www.fws.gov/endangered/pdfs/peregrin/Peregrineplan2003.pdf>. Formal collection of monitoring data commenced in 2003. Rangewide population monitoring of American peregrine falcons under the Monitoring Plan will take place every 3 years through 2015.

We will use the information supplied on the FWS Forms 3-2307, 3-2308, and 3-2309 to review the status of the American peregrine falcon in the United States and determine if it remains
