[60 Day-01-25]

#### Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the

proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639-7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques for other forms of information technology. Send comments to Anne O'Connor, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

#### Proposed Project

Evaluating HIV Prevention Programs in Community-Based Organizations (CBOs)—New—The National Center for HIV, STD, and TB Prevention (NCHSTP), Centers for Disease Control and Prevention (CDC) proposes to evaluate HIV prevention programs in community-based organizations (CBOs)

through a quarterly and annual reporting system. This evaluation is necessary to understand the impact of CDC's expenditures and efforts to support CBOs, and for modifying and improving the prevention efforts of CBOs. This data collection will provide CDC with standardized data which will allow CDC to (a) determine the extent to which HIV prevention efforts have contributed to a reduction in HIV transmission nationally; (b) improve programs to better meet the goal of reducing HIV transmission; (c) help focus technical assistance and support; and (d) be accountable to stakeholders by informing them of progress made in HIV prevention nationwide. CDC currently funds 181 CBOs.

Each CBO will be asked to report on the following types of interventions that it has implemented (a) individual level interventions; (b) group level interventions; (c) street and community outreach; (d) prevention case management; (e) partner counseling and referral services; (f) health communications/public information; (g) community level interventions; and (h) HIV antibody counseling and testing.

The total annual cost to respondents is estimated at \$30,770 based on an average salary of \$35,000 for program managers.

Respondents	Number of respondents	Number of responses	Avg. burden per response (in hrs.)	Total burden (in hrs.)
Intervention Plan .....	181	1	2	362
Process Monitoring .....	181	4	2	1,448
Total .....				1,810

Dated: February 28, 2001.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

**AGENCY:** Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

**ACTION:** Notice.

**SUMMARY:** The Centers for Disease Control and Prevention (CDC) is seeking a CRADA partner for collaboration to examine the use of CD40L as a

molecular adjuvant to enhance the humoral and cellular immune responses to Respiratory Syncytial Virus (RSV) and other viral vaccines. The methods comprise expression of the immune-enhancing CD40L molecule with viral antigens in vaccines or addition of CD40L to viral antigens in vaccines to augment the antibody and cellular immune responses to the vaccine antigens. RSV is one example of a viral agent for which vaccines are sought and for which CD40L might prove to be a safe and effective adjuvant.

Because CRADAs are designed to facilitate the development of scientific and technological knowledge into useful, marketable products, a great deal of freedom is given to Federal agencies in implementing collaborative research. The CDC may accept staff, facilities, equipment, supplies, and money from the other participants in a CRADA; CDC

may provide staff, facilities, equipment, and supplies to the project. There is a single restriction in this exchange: CDC MAY NOT PROVIDE FUNDS to the other participants in a CRADA. This opportunity is available until 30 days after publication of this notice. Respondents may be provided a longer period of time to furnish additional information if CDC finds this necessary.
