

Accordingly, numerous FMP and amendments have been developed by the Region which requires the collection of information for purposes of proper implementation of these rules.

Regulations implementing the FMP and their collection of information appear at 50 CFR 600.305, 50 CFR 600.315, and 50 CFR 622.5.

The need to collect percent ownership in a corporation from permit holders is necessary information for the red snapper Individual Fishing Quota (IFQ) program. The IFQ program has a cap of six percent on share percent ownership. Without the ability to track corporate shareholder information, NOAA Fisheries Service will be unable to enforce this share ownership cap. Additionally, crew size is being collected to better understand the nature of the fishery, the number of participants who are not permit holders, and the potential socioeconomic effects of regulations within a given fishery.

The workshop will bring

together individuals from federal mapping agencies, non-federal mapping interests, and stakeholders to frame a Strategic Action Plan designed to expand, improve, and/or develop (a) coordination and partnerships; (b) data collection, availability, dissemination, interoperability, and standardization; and (c) products and tools required of ocean and coastal geospatial data users.

The public plenary sessions are accessible to people with physical disabilities. Public comment periods will be scheduled at the end of the day's deliberations on Tuesday and Thursday.
