

subcontracting with other organizations, etc., as well as the financial condition of the organization. All of this information is considered by CSREES prior to award to determine the grantee is both managerially and fiscally responsible. This information is submitted to CSREES on a one-time basis. If sufficient changes occur within the organization, the grantee submits revised information.

With regards to compliance with the Government Paperwork Elimination Act (44 U.S.C. 3504 note), CSREES is proposing to postpone making an electronic option available for this information collection until the Federal government-wide electronic process is developed for collecting organizational information and statutory certifications from new grantees. Under the Federal Financial Assistance Management Improvement Act of 1999 (Pub.L. No. 106-107), Federal agencies and OMB have been working together to streamline and simplify the award and administration of Federal grants. As a result of these activities, Federal agencies and OMB are proposing various regulations, policies, and business processes that will decrease the overall information collection burden to grant recipients by having a central location where this information is collected for use by all Federal grantmaking agencies.

Estimate of the Burden: CSREES estimates the number of responses for the Form CSREES-665 will be 150 with an estimated response time of .5 hour per form, representing a total annual burden of 75 hours for this form. CSREES estimates the number of responses for the Form CSREES-666 will be 150 with an estimated response time of 6.3 hours per form, representing a total annual burden of 945 hours for this form. These estimates are based on a survey of grantees who had recently been approved for grant awards. They were asked to give an estimate of time it took them to complete each form. This estimate was to include such things as: (1) Reviewing the instructions; (2) searching existing data sources; (3) gathering and maintaining the data needed; and (4) actual completion of the forms. The average time it took each respondent was calculated from their responses.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have a practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the

validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.
