Abstract: The New Source Performance Standards (NSPS) for Glass Manufacturing Plants (40 CFR part 60, subpart CC) were proposed on June 15, 1979; promulgated on October 7, 1980; and amended on both October 19, 1984 and October 17, 2000. These regulations apply to both existing and new glass melting furnaces located at glass manufacturing plants. New facilities include those that either commenced construction, or modification, or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart CC.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to the NSPS.

Form Numbers: None.

Respondents/affected entities: Glass melting furnaces located at glass manufacturing plants.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart CC).

Estimated number of respondents: 41 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 850 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$444,000 (per year), which includes \$337,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden.

There is an increase in operation & maintenance costs due to an adjustment to increase from 2008 to 2022 \$ using the CEPCI Equipment Cost Index.

Director, Information Engagement Division.
