

the oscilloscopes in Singapore, the final programming and assembly of the oscilloscopes was in Singapore and hence represented the last substantial transformation. Therefore, CBP found that the country of origin of the oscilloscopes was Singapore.

HQ H170315, dated July 28, 2011, concerned the country of origin of satellite telephones. CBP was asked to consider six scenarios involving the manufacture of PCBs in one country and the programming of the PCBs with second country software either in the first country or in a third country where the phones were assembled. In the third scenario, the application and transceiver boards for satellite phones were assembled in Malaysia and programmed with U.K.-origin software in Singapore, where the phones were also assembled. CBP found that no one country's operations dominated the manufacturing operations of the phones and that the last substantial transformation occurred in Singapore. *See also* HQ H014068, dated October 9, 2007 (CBP determined that a cellular phone designed in Sweden, assembled in either China or Malaysia and shipped to Sweden, where it was loaded with software that enabled it to test equipment on wireless networks, was a product of Sweden. Once the software was installed on the phones in Sweden, they became devices with a new name, character and use, that is, network testing equipment. As a result of the programming operations performed in Sweden, CBP found that the country of origin of the network testing equipment was Sweden).

In this case, substantial manufacturing operations are performed in China, the U.S., Korea, and Italy. The electronics module, which is partially assembled in China, is imported into the U.S., where it is assembled with other core components, including the Korean-origin transducers that send and receive the acoustic signals, the Italian-origin monitor that permits display of images, and the U.S.-origin control panel that serves as the user interface. The completely assembled ultrasound systems are then uploaded with U.S. designed, developed, and written operating system software and application software. You state that the software is necessary for the ultrasound systems to perform their intended function of providing diagnostic information (an observable image with related data). As previously noted, it takes approximately 23–24 hours to produce the finished S2000 ultrasound system of which 13–14 hours takes place in the U.S. It takes approximately 24–25 hours to produce the finished Antares ultrasound system of which 14–15 hours takes place in the U.S. You claim that the assembly, integration, and testing in the U.S. is conducted by specialized technicians. You also state that all of the research & development, product engineering and design investment occur in the U.S. Based on the totality of the circumstances, we find that the last substantial transformation occurs in the U.S., the location where the final assembly and installation of the operating system software and application software occurs. Prior to the assembly and programming in the U.S., the products are unable to carry out the functions

of ultrasound systems. However, the assembly and programming in the U.S. creates a new product that is capable of providing diagnostic information. Consequently, we find that the country of origin of the ultrasound systems is the U.S.

HOLDING:

The imported components that are used to manufacture the S2000 and Antares ultrasound systems are substantially transformed as a result of the assembly and software installation operations performed in the U.S. Therefore, we find that the country of origin of the S2000 and Antares ultrasound systems for government procurement purposes is the U.S.

Notice of this final determination will be given in the *Federal Register*, as required by 19 C.F.R. § 177.29. Any party-at-interest other than the party which requested this final determination may request, pursuant to 19 C.F.R. § 177.31, that CBP reexamine the matter anew and issue a new final determination. Pursuant to 19 C.F.R. § 177.30, any party-at-interest may, within 30 days after publication of the *Federal Register* notice referenced above, seek judicial review of this final determination before the Court of International Trade.

Sincerely,

Sandra L. Bell,

Executive Director, Regulations and Rulings,
Office of International Trade.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD has submitted to OMB a request for approval of the Information collection described below. This notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This Notice also lists the following information:

Title of Proposal: Standardized Form for Collecting Information Regarding Race and Ethnic Data.

OMB Control Number if applicable: 2535-0113.

Description of the need for the information and proposed use: HUD's standardized form for the Collection of Race and Ethnic Data complies with OMB's revised standards for Federal Agencies issued, October 30, 1997. These standards apply to HUD Program Office and partners that collect, maintain, and report Federal Data on race and ethnicity for program administrative reporting.

Agency form numbers, if applicable: HUD-27061, identified on Grants.gov as HUD Race Ethnic Form.

Members of Affected Public: Individuals or Households, Business or other-for-profit, Not-for-profit

institutions, State, Local or Tribal Government.

Estimation of the total number of hours needed to prepare the information collection including number of responses, frequency of responses, and hours of responses: This proposal will result in no significant increase in the current information collection burden. An estimation of the total number of hours needed to provide the information for each grant application is 1 hour; however, the burden will be assessed against each individual grant program submission under the Paperwork Reduction Act; number of respondents is an estimated 11,000; 60% of responses will be quarterly and 40% annually.

Status of the proposed information collection: Extension of a currently approved collection.

Authority: The Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: April 1, 2013.

Anne Morillon,

Director, Grants Management and Oversight Division, Office of Strategic Planning and Management.
