SUPPLEMENTARY INFORMATION:

I. Background, Purpose and Legal Basis

The CSX Transportation railroad drawbridge crosses the Bay St. Louis, mile 0.5, Bay St. Louis, MS. The bridge will continue to open according to the drawbridge regulations but the bridge tender will operate this bridge from a remote location at the CSX railroad terminal in Mobile, Alabama. This bridge has a 13 foot vertical clearance at mean high water, an unlimited vertical clearance when in the open to vessel position and a 100’ horizontal clearance. The bridge operates according to 33 CFR 117.5.

CSX Transportation has requested to operate this bridge remotely from their railroad terminal in Mobile, AL. CSX has installed a remote operation system at the bridge and a remote control center, located in Mobile, AL. At the bridge, CSX has installed infrared cameras, closed circuit cameras and TVs, communication systems and information technology systems on the bridge that allow an operator from Mobile to monitor and control the bridge. This waterway is used primarily by recreational boats and small towing vessels and opens to vessels approximately 6 times per day.

The Coast Guard will evaluate the impact of this test on vessels by analyzing CSX bridge tender logs and public comments.

The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the test deviation.
