

day comment period so that comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.

Rural Utilities Service

Highwood Generating Station Environmental Impact Statement (EIS)

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice of availability of record of decision (ROD).

SUMMARY: In accordance with the Rural Electrification Act of 1936, the National Environmental Policy Act of 1969 (NEPA), and the Montana Environmental Policy Act, the Rural Utilities Service (RUS), an Agency delivering the United States Department of Agriculture's (USDA) Rural Development Utilities Programs, hereinafter referred to as Rural Development and/or Agency, and the Montana Department of Environmental Quality (DEQ) announce the availability of the ROD for the EIS for the Highwood Generating Station (HGS), proposed to be located near Great Falls, Montana. The Administrator, Utilities Programs,

USDA Rural Development, and the Director, DEQ, have signed the ROD, which is effective upon signing.

ADDRESSES: To obtain copies of the HGS ROD, or for further information, contact: Richard Fristik, Senior Environmental Protection Specialist, U.S. Department of Agriculture, Rural Development Utilities Programs, 1400 Independence Ave., SW, Stop 1571, Washington, DC 20250, phone (202) 720-5093 (richard.fristik@wdc.usda.gov); or Kathleen Johnson, Environmental Impact Specialist, Montana Department of Environmental Quality, P. SUPPLEMENTARY INFORMATION: The Southern Montana Electric Generation and Transmission Cooperative, Incorporated (SME) proposes to build and operate a 250 (net) megawatt (MW), Circulating Fluidized Bed (CFB), coal-fired electric power plant—called the Highwood Generating Station (HGS)—and 6 MW of wind generation at a site near Great Falls, Montana. SME will lose its principal supply of power from the Bonneville Power Administration beginning in part in 2008 and in full in 2011; thus, the purpose and need of the proposal is for SME to replace that power supply with another source of reliable, long-term, affordable electric energy and related services in order to fulfill its obligations to its member rural electric cooperatives. In order to meet the projected electric power deficit, SME formally applied to Rural Development in 2004 for a loan guarantee for the construction of an electric generating source, the proposed HGS, and related transmission facilities. In September 2005, SME submitted a draft air quality permit application to DEQ and formally applied for an air quality permit in November 2005. The application was reviewed and a draft preliminary determination (PD) was released for public review and comment on March 30, 2006. Comments on the draft PD resulted in a supplemental PD that was included in the Draft and Final EIS. A solid waste management license application was submitted to the DEQ on March 20, 2006.
