

Date of issuance: December 5, 2000.

Effective date: December 5, 2000.

Amendment No.: 29 and 29.

Facility Operating License No. NPF-90: Amendment revises the Operating License.

Date of initial notice in Federal

Register: September 20, 2000 (65 FR 56957). The November 6, 9, and 21, 2000, supplements provided clarifying information that did not change the scope of the initial proposed no significant hazards consideration determination.

No significant hazards consideration comments received: No.

Tennessee Valley Authority, Docket No. 50-390, Watts Bar Nuclear Plant, Unit 1, Rhea County, Tennessee

Date of application for amendment: October 30, 2000, as supplemented November 15 and 22, 2000.

Brief description of amendment:

Allow a one-time-only increase in the diesel generator Action Completion Time from 72 hours to 10 days to facilitate repairs to an emergency diesel generator to improve reliability.

Date of issuance: December 8, 2000.

Effective date: December 8, 2000.

Amendment No.: 30.

Facility Operating License No. NPF-90: Amendment revises the Technical Specifications.

Date of initial notice in Federal

Register: November 3, 2000 (65 FR 66266). The November 15 and 22, 2000 supplements provided clarifying information that did not change the scope of the initial proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 8, 2000.

No significant hazards consideration comments received: No.

TXU Electric, Docket Nos. 50-445 and 50-446, Comanche Peak Steam Electric Station, Units 1 and 2, Somervell County, Texas

Date of amendment request: August 10, 2000.

Brief description of amendments: The amendments change Technical Specification (TS) 5.6.5, "Core Operating Limits Report," to incorporate the latest, Nuclear Regulatory Commission (NRC)-approved methodology for analysis of large break loss-of-coolant accidents (LBLOCAs) for Comanche Peak Steam Electric Station, Units 1 and 2. The acceptability of this change to TS 5.6.5 is based upon the NRC staff's conclusion that the LBLOCA analysis methodology described in TXU

Electric's Topical Report ERX-2000-002-P, "Revised Large Break Loss of Coolant Accident Methodology," March 2000, is acceptable, as addressed in the associated Safety Evaluation.

Date of issuance: October 6, 2000.

Effective date: As of the date of issuance and shall be implemented within 30 days from the date of issuance.

Amendment Nos.: 80 and 80.

Facility Operating License Nos. NPF-87 and NPF-89: The amendments revised the Technical Specifications.

Date of initial notice in Federal

Register: August 23, 2000 (65 FR 51363).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated October 6, 2000.

No significant hazards consideration comments received: No.

TXU Electric, Docket Nos. 50-445 and 50-446, Comanche Peak Steam Electric Station, Unit Nos. 1 and 2, Somervell County, Texas

Date of amendment request: May 2, 2000, as supplemented August 30, 2000.

Brief description of amendments: The amendments change the CPSES Security Plan to: (1) Allow response team members to perform compensatory measures for protective area intrusion detection or closed circuit television failure, and (2) to modify the patrol frequency for the protected area.

Date of issuance: December 5, 2000.

Effective date: As of the date of issuance and shall be implemented within 30 days from the date of issuance.

Amendment Nos.: 82 and 82.

Facility Operating License Nos. NPF-87 and NPF-89: The amendments revised the Security Plan.

Date of initial notice in Federal

Register: October 4, 2000 (65 FR 59226).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 5, 2000.

No significant hazards consideration comments received: No.

Dated at Rockville, Maryland, this 21st day of December 2000.

For the Nuclear Regulatory Commission.

John A. Zwolinski,

Director, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR WASTE TECHNICAL REVIEW BOARD

Board Meeting: January 30-31, 2001—Amargosa Valley, Nevada: Discussions of the Status of DOE Studies Related to a Potential Yucca Mountain, Nevada, Repository for Spent Nuclear Fuel and High-Level Radioactive Waste; Update on Scientific and Engineering Studies Undertaken at the Yucca Mountain site; and Update on the DOE's Development of a Safety Strategy for a Potential Yucca Mountain Repository

Pursuant to its authority under section 5051 of Public Law 100-203, Nuclear Waste Policy Amendments Act of 1987, on Tuesday and Wednesday, January 30 and January 31, 2001, the Nuclear Waste Technical Review Board (Board) will be in Amargosa Valley, Nevada, to discuss U.S. Department of Energy (DOE) efforts to characterize a site at Yucca Mountain, Nevada, as the possible location of a permanent repository for spent nuclear fuel and high-level radioactive waste. The Board will ask the DOE to address several questions about important technical and scientific issues related to evaluating the suitability of the potential repository site. The meeting is open to the public, and several opportunities for public comment will be provided. The Board is charged by Congress with reviewing the technical and scientific validity of DOE activities related to civilian radioactive waste management.

The Board meeting will be held at the Longstreet Inn, HCR 70, Box 559, Amargosa Valley, Nevada. The telephone number is (775) 372-1777; the fax number is (775) 372-1280. The meeting will start at 8:00 a.m. on both days and will be open to the public.

Representatives of Nye County will lead off the meeting on Tuesday, January 30, with a greeting, which will be followed by the introduction of the Acting Director of the DOE's Office of Civilian Radioactive Waste Management and the General Manager of the new contractor for the Yucca Mountain Project, Bechtel SAIC Company LLC. The Board also will hear from Dr. Jean-Claude Duplessy, a member of France's National Scientific Evaluation Committee (CNE), which oversees the scientific and technical activities of the French nuclear waste disposal program. During the rest of the morning session, the DOE will make presentations on the status of the Yucca Mountain Project. It will give a general overview of the program and discuss plans for issuing the site recommendation consideration report. The DOE then will address a specific question from the Board dealing

with the analysis of water flow in the unsaturated zone above the proposed repository. After lunch, the Board will ask the DOE to focus on four questions from the Board, dealing in turn with waste package corrosion, repository design, the flow of water in the saturated zone below the proposed repository, and the DOE's analysis of effects of early waste package failures.

On Wednesday, January 31, the DOE will update the Board on ongoing scientific and engineering studies related to the Yucca Mountain site. The update will be followed by a briefing on DOE plans for developing a capability to monitor and confirm its projected behavior of the repository system. The DOE will explain how it intends to create a "learning organization." The DOE also will discuss the status of its efforts to quantify uncertainty in its performance assessments of the proposed Yucca Mountain repository. After lunch, the DOE will discuss the latest version of its repository safety strategy. Nye County will update results obtained from the its Early Warning Drilling Program. The Electric Power Research Institute will describe its latest performance assessment of a proposed Yucca Mountain repository.

Opportunities for public comment will be provided before the lunch breaks and at the end of the sessions on both days. In addition, interested parties are invited to join Board members for coffee from 7:15 a.m. to 7:55 a.m. on Wednesday, January 31, at the Longstreet Inn. Those wanting to speak during the public comment periods are encouraged to sign the "Public Comment Register" at the check-in table. A time limit may have to be set on individual remarks, but written comments of any length may be submitted for the record. Interested parties also will have the opportunity to submit questions in writing to the Board. As time permits, the questions will be answered during the meeting.

A detailed agenda will be available approximately one week before the meeting. Copies of the agenda can be requested by telephone or obtained from the Board's Web site at <http://www.nwtrb.gov>. Transcripts of the meeting will be available on the Board's Web site, via e-mail, on computer disk, and on a library-loan basis in paper format from Davonya Barnes of the Board staff, beginning on March 2, 2001.

A block of rooms have been reserved at the Longstreet Inn. When making a reservation, please state that you are attending the Nuclear Waste Technical Review Board meeting. For more information, contact the NWTRB, Karyn Severson, External Affairs; 2300

Clarendon Boulevard, Suite 1300; Arlington, VA 22201-3367; (tel) 703-235-4473; (fax) 703-235-4495; (e-mail) info@nwtrb.gov.

The Nuclear Waste Technical Review Board was created by Congress in the Nuclear Waste Policy Amendments Act of 1987. The Board's purpose is to evaluate the technical and scientific validity of activities undertaken by the Secretary of Energy related to managing the disposal of the nation's spent nuclear fuel and high-level radioactive waste. In the same legislation, Congress directed the DOE to characterize a site at Yucca Mountain, Nevada, to determine its suitability as the location of a potential repository for the permanent disposal of spent nuclear fuel and high-level radioactive waste.

Dated: December 21, 2000.

Joyce M. Dory,

Acting Executive Director, Nuclear Waste Technical Review Board.

BILLING CODE 6820-AM-M

POSTAL SERVICE

Privacy Act of 1974, System of Records

AGENCY: Postal Service.

ACTION: Notice of new system of records.

SUMMARY: The purpose of this document is to publish notice of a new Privacy Act system of records, USPS 040.060, Customer Programs-Customer Electronic Bill Presentment and Payment Records. The new system contains records about individuals who use the Postal Service's electronic bill presentment and payment (EBP) service.

DATES: This proposal will become effective without further notice on February 5, 2001, unless comments received on or before that date result in a contrary determination.

COMMENTS DUE BY: February 5, 2001.

ADDRESSES: Any interested party may submit written comments on the proposed new system of records. Written comments on this proposal should be mailed or delivered to: Finance Administration/FOIA, United States Postal Service, 475 L'Enfant Plaza SW., RM 8141, Washington, DC 20260-5202. Copies of all written comments will be available at the above address for public inspection and photocopying between 8 a.m. and 4:45 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Robert J. Faruq, 202-268-2608.

SUPPLEMENTARY INFORMATION: The Postal Service is offering an electronic bill

presentment and payment (EBP) service that allows customers to conveniently and securely register, access, and pay their bills through the Postal Service's WEB site (<http://www.usps.com>). This notice establishes a new Privacy Act system of records, USPS 040.060, Customer Programs-Customer Electronic Bill Presentment and Payment Records, to cover individuals' records that are collected and maintained as a result of providing that service.

To use the EBP service, a customer registers once by providing identifying information, such as name, address, date of birth, telephone numbers, and e-mail address, that will be maintained in the system for that customer's transactions. Confirmation of registration and verification of the accuracy of information collected is sent by mail. Once registered, the customer can view all of his or her bill summaries that are registered with the service and navigate where applicable to the provider's or biller's site to obtain details of a particular bill. The customer then can return to the EBP service to pay that bill or any bills listed on the bill summary page. The EBP service also allows a customer to order the payment of a bill not registered with the service by providing the limited information needed for payment.

General routine use statements b, e, f, and j listed in the prefatory statement at the beginning of the Postal Service's published system notices apply to this system in that they are disclosures routinely necessary to conduct business. These include the need to disclose in litigation involving the Postal Service; to a contractor fulfilling an agency function; to a congressional office at the request of the record's subject; and to outside auditors in connection with an audit of Postal Service finances. These general routine uses were last published in the **Federal Register** on October 26, 1989 (54 FR 43654-43655).

In addition, five routine uses have been added. Routine use No. 1 permits disclosure to the Postal Service contractor who is providing bill payment and customer support services for EBP. Routine use No. 2 permits disclosure to a payee or financial institution to resolve payment-posting problems. Routine use No. 3 permits disclosure to an authorized credit bureau for the purpose of identity verification. Routine use No. 4 permits disclosure for law enforcement purposes only pursuant to a federal search warrant. Routine use No. 5 permits disclosure pursuant to a federal court order.

The new system is not expected to have an adverse effect on individual
