**SUPPLEMENTARY INFORMATION:** On March 15, 2023, the Bureau issued a request for information seeking information from the public on the data broker industry. Data brokers is an umbrella term to describe firms that collect, aggregate, sell, resell, license, or otherwise share consumers' personal information with other parties. Data brokers encompass actors such as first-party data brokers that interact with consumers directly, as well as third-party data brokers with whom the consumer does not have a direct relationship. Data brokers include firms that specialize in preparing employment background screening reports and credit reports. Data brokers collect information from public and private sources for purposes including marketing and advertising, building and

refining proprietary algorithms, credit and insurance underwriting, consumer-authorized data porting, fraud detection, criminal background checks, identity verification, and people search databases.

This request for information seeks comments from the public on data brokers. The submissions in response to this request for information will serve to assist the CFPB and policymakers in understanding the current state of business practices in exercising enforcement, supervision, regulatory, and other authorities. The CFPB welcomes stakeholders to submit data, analysis, research, and other information about data brokers. The CFPB also requests input from individuals who have interacted with or have been affected by data broker business practices.

The Bureau has determined that it is appropriate to extend until July 15, 2023, the comment period on this request for information. This extension will allow interested persons more time to pull together the requested information for submission. The comment period will now close on July 15, 2023.
