Transportation conformity is required by Clean Air Act section 176(c). The EPA's conformity rule requires that transportation plans, transportation improvement programs, and transportation projects conform to a state's SIP and establishes the criteria and procedures for determining whether or not they conform. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the NAAQS.

The criteria we use to determine whether a SIP's motor vehicle emissions budgets are adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4), promulgated on August 15, 1997.³ We further described our process for determining the adequacy of submitted SIP budgets in our final rule dated July 1, 2004, and we used the information in these resources in making our adequacy determination.⁴ Please note that an adequacy review is separate from the EPA's completeness review and should not be used to prejudice the EPA's ultimate action on the SIP submittal. Even if we find a budget adequate, the SIP submittal could later be disapproved.

Pursuant to 40 CFR 93.104(e), within two years of the effective date of this notice, San Joaquin Valley MPOs and the U.S. Department of Transportation will need to demonstrate conformity to the new budgets if the demonstration has not already been made.⁵ Once the San Joaquin Valley MPOs have used the adequate budgets to demonstrate conformity of their transportation plans to the 15 µg/m³ SIP Revision, the conformity freeze put in place as of December 27, 2021, under 40 CFR 93.120(a)(2)⁶ will be lifted. For

demonstrating conformity to the budgets in this plan, the on-road motor vehicle emissions from implementation of the transportation plan or program should be projected consistently with the budgets in this plan, *i.e.*, by taking the emissions results derived from CARB's EMFAC model (short for Emission FACTor) and then rounding the emissions up to the nearest tenth of a ton per day. The trading mechanism for the budgets in the 15 µg/m³ SIP Revision for the 1997 annual PM_{2.5} NAAQS is not yet approved. The EPA will consider approval of the trading mechanism as part of the action on the submittal.
