

Southwestern's marketing area includes these States plus Kansas and Louisiana. Southwestern markets Federal power and energy, and owns and operates a transmission system to integrate its hydroelectric resources in order to reliably deliver such power and energy. Southwestern provides transmission services for the transmission of non-Federal power and energy across Southwestern's transmission system only to the extent that capacity is available over and above that required to fulfill Southwestern's mission and obligations under section 5 of the Flood Control Act of 1944. Nothing in the proposed tariff is intended to alter, amend, or abridge Southwestern's statutory obligation to market Federal power and to repay the Federal investment in the hydroelectric generation projects from which it markets power as well as the investment in its associated transmission system.

On March 31, 2005, Southwestern and the SPP RTO entered into an agreement, which became effective April 1, 2005, and which provides for the SPP RTO to administer Southwestern's Tariff, provide regional reliability council services, scheduling services, operating reserve sharing, Open Access Same Time Information System ("OASIS") administration, and reliability coordination. The agreement, accepted for filing by the Commission as SPP RTO tariff Attachment AD, also facilitates the reciprocal use of Southwestern's and the SPP RTO's transmission facilities and provides for Southwestern's participation in regional transmission expansion. To provide consistency with the regional practices of the SPP RTO, Southwestern has made changes to its Tariff scheduling, transmission service application, available transmission capability, and facilities studies timing requirements. Changes have also been made to the provisions of Southwestern's Tariff concerning generation redispatch that clarify Southwestern's limitations in the use of its generation resources to provide redispatch under Southwestern's Tariff. The water used to supply the energy from Southwestern's hydroelectric generation resources is limited, and the use of such water and generation resources from Federal hydroelectric projects within congressionally authorized purposes is dictated by Federal statute. These limitations are consistent with the agreement between Southwestern and the SPP RTO.

Following review of the oral and written comments and the information gathered in the course of the proceedings, the Administrator will

submit the finalized Tariff to the Commission and request a declaratory order that the Tariff meets Commission requirements as set forth in Commission Order No. 888, *et al.*, to the extent consistent with applicable law. The revised Tariff is posted on Southwestern's Web site at <http://www.swpa.gov>. Southwestern must receive written comments by the end of the informal comment period to ensure they are considered in Southwestern's filing with the Commission.

Dated: October 14, 2005.

Michael A. Deihl,

Administrator.

Federal Agency Hazardous Waste Compliance Docket (Federal Docket Management System #—SFUND-2005- 0004)

AGENCY: Environmental Protection
Agency.

ACTION: Notice of twenty-first update of
the Federal Agency Hazardous Waste
Compliance Docket, pursuant to
CERCLA section 120(c).

SUMMARY: Section 120(c) of the
Comprehensive Environmental
Response, Compensation, and Liability
Act of 1980 (CERCLA), as amended by
the Superfund Amendments and
Reauthorization Act of 1986 (SARA),
requires the Environmental Protection
Agency (EPA) to establish a Federal
Agency Hazardous Waste Compliance
Docket. The docket is to contain certain
information about Federal facilities that
manage hazardous waste or from which
hazardous substances have been or may
be released. (As defined by CERCLA
section 101(22), a release is any spilling,
leaking, pumping, pouring, emitting,
emptying, discharging, injecting,
escaping, leaching, dumping, or
disposing into the environment.)
CERCLA requires that the docket be
updated every six months, as new
facilities are reported to EPA by Federal
agencies. The following list identifies
the Federal facilities to be included in
this twenty-first update of the docket
and includes facilities not previously
listed on the docket and reported to EPA
since the last update of the docket, 69
FR 75951, December 20, 2004, which
was current as of September 13, 2004.
SARA, as amended by the Defense
Authorization Act of 1997, specifies
that, for each Federal facility that is
included on the docket during an
update, evaluation shall be completed
in accordance with a reasonable
schedule. Such site evaluation activities
will help determine whether the Federal
facility should be included on the
National Priorities List (NPL) and will
provide EPA and the public with
valuable information about the facility.
In addition to the list of additions to the
docket, this notice includes a section

that comprises revisions (that is,
corrections and deletions) of the
previous docket list. This update
contains 3 additions and 12 deletions
since the previous update, as well as
numerous other corrections to the
docket list. At the time of publication of
this notice, the new total number of
Federal facilities listed on the docket is
2,282.

DATES: This list is current as of February
4, 2005.

1.0 Introduction

Section 120(c) of the Comprehensive
Environmental Response,
Compensation, and Liability Act of 1980
(CERCLA), 42 United States Code
(U.S.C.) 9620(c), as amended by the
Superfund Amendments and
Reauthorization Act of 1986 (SARA),
required the establishment of the
Federal Agency Hazardous Waste
Compliance Docket. The docket
contains information on Federal
facilities that is submitted by Federal
agencies to the U.S. Environmental
Protection Agency (EPA) under sections
3005, 3010, and 3016 of the Resource
Conservation and Recovery Act (RCRA),
42 U.S.C. 6925, 6930, and 6937, and
under section 103 of CERCLA, 42 U.S.C.
9603. Specifically, RCRA section 3005
establishes a permitting system for
certain hazardous waste treatment,
storage, and disposal (TSD) facilities;
RCRA section 3010 requires waste
generators and transporters and TSD
facilities to notify EPA of their
hazardous waste activities; and RCRA
section 3016 requires Federal agencies
to submit biennially to EPA an
inventory of hazardous waste sites that
the Federal agencies own or operate.
CERCLA section 103(a) requires that the
National Response Center (NRC) be
notified of a release of a hazardous
substance in quantities equal to or
greater than the reportable quantity
levels established pursuant to CERCLA
section 102. CERCLA section 103(c)
requires reporting to EPA the existence

of a facility at which hazardous
substances are or have been stored,
treated, or disposed of and the existence
of known or suspected releases of
hazardous substances at such facilities.

The docket serves three major
purposes: (1) To identify all Federal
facilities that must be evaluated to
determine whether they pose a risk to
human health and the environment
sufficient to warrant inclusion on the
National Priorities List (NPL); (2) to
compile and maintain the information
submitted to EPA on such facilities
under the provisions listed in section
120(c) of CERCLA; and (3) to provide a
mechanism to make the information
available to the public.

The initial list of Federal facilities to
be included on the docket was
published on February 12, 1988 (53 FR
4280). Updates of the docket have been
published on November 16, 1988 (54 FR
46364); December 15, 1989 (54 FR

(68 FR 240); July 19, 2004 (69 FR
42989); and December 20, 2004 (69 FR
75951). This notice constitutes the
twenty-first update of the docket.

Today's notice is divided into three
sections: (1) Additions, (2) deletions,
and (3) corrections. The additions
section lists newly identified facilities
that have been reported to EPA since the
last update and that now are being
included on the docket. The deletions
section lists facilities that EPA is
deleting from the docket. The
corrections section lists changes in
information about facilities already
listed on the docket.

The information submitted to EPA on
each Federal facility is maintained in
the docket repository located in the EPA
Regional office of the Region in which
the facility is located (see 53 FR 4280
(February 12, 1988) for a description of
the information required under those
provisions). Each repository contains
the documents submitted to EPA under
the reporting provisions and
correspondence relevant to the reporting
provisions for each facility. Contact the
