

bands. ESV operators must submit applications (FCC Form 312) and exhibits (Schedule B) to the Commission to demonstrate that they comply with the Commission's legal and/or engineering rules. Additionally, the Commission requires a myriad of technical information such as, but not limited to, frequency of operation, off-axis effective isotropically radiated power spectral density, and the geographic area(s) in which the ESVs will operate to evaluate potential interference to existing users from ESVs. The purposes of this information collection are as follows: (1) Establish licensing and service rules for ESVs in the Ku-band and C-band; (2) prevent harmful interference to Fixed Services (FS), Fixed Satellite Service (FSS) and a limited number of Federal government facilities; (3) further the Commission's goals to manage spectrum efficiently; and (4) advance the provision of broadband telecommunications services that will benefit U.S. citizens on passenger, government (military and civilian), cargo and large recreational vessels. Without such information, the Commission would not be able to take the necessary measures to prevent harmful interference to existing users' operations from ESVs. Finally, the Commission would not be able to advance its goals of managing spectrum efficiently and promoting broadband technologies to benefit American consumers throughout the United States and abroad.
