

remedial actions for implementation at the remaining properties. The remedial actions included, among other things, the removal of radiologically contaminated building components and repair/reconstruction of such components at several parcels; permanent off-Site relocation of several homeowners to existing housing followed by demolition and disposal of their original homes; temporary off-Site relocation of several homeowners followed by demolition, disposal, and on-Site reconstruction of their original homes; excavation and disposal of radiologically contaminated soils at the warehouse property; and post-cleanup verification to confirm that cleanup standards established in the ROD were achieved. EPA removed and disposed of approximately 5951.44 tons of radiologically contaminated debris; 150,000 cubic feet of contaminated soils; 1620 cubic feet of asbestos-containing materials; and 1910 tons of non-hazardous construction debris.

Cleanup standards selected by EPA in the ROD required that all Site-related soil contamination at residential and potentially residential properties be removed to 5 pCi/g, averaged over 100 square meters¹; that Site-related soil contamination at public-use properties (defined by example as streets and railroad rights-of-way) be removed to the residential standard if radium 226 concentrations exceeded 5 pCi/g in the top 15 centimeters and/or 15 pCi/g in subsoils, averaged over 100 square meters; and that institutional controls restricting land use be implemented if cleanup to these standards could not be achieved. The cleanup standards have been achieved and no institutional controls are necessary. There are no operation or maintenance requirements to ensure the continued protectiveness of the remedial actions.

Response Actions—Operable Unit Two

On September 27, 1996, EPA Region III issued a 'No Remedial Action' ROD for Site-related groundwater. The No Action decision was based on EPA's conclusion that the groundwater presented no risks to human health or welfare or to the environment.

Five-Year Review

Section 121(c) of CERCLA, 42 U.S.C. 9621(c), as interpreted by § 300.430(f)(4)(ii) of the NCP, 40 CFR 300.430(f)(4)(ii), requires that EPA conduct a review, no less often than every five years after initiation of

remedial action, at sites where hazardous substances or pollutants or contaminants will remain above levels that allow for unlimited use and unrestricted exposure. Attainment of the cleanup standards has resulted in the removal of all Site-related radiological contamination such that restrictions on use and/or exposure are unnecessary. Accordingly, no five-year reviews are required by CERCLA.

Applicable Deletion Criteria

In consultation with PADEP, EPA has determined that all appropriate Fund-financed response under CERCLA has been implemented at the Site and that no further response action by responsible parties is appropriate. Consequently, EPA proposes to delete the Site from the NPL.

State Concurrence

By letter dated December 28, 2001, the Pennsylvania Department of Environmental Protection concurred with the proposed deletion of the Austin Avenue Radiation Superfund Site from the NPL, provided that completion requirements for the Site described in the Final Closeout Report have been met, the cleanup has achieved the objectives established in the ROD and no institutional controls are required, radiologically contaminated soils and structures have been removed, and no action is required for groundwater at the Site. The conditions upon which the State has predicated its concurrence on the deletion of the Site from the NPL have been satisfied.

Dated: January 25, 2002.

Acting Regional Administrator, Region III.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[FRL-7144-7]

National Oil and Hazardous Substance; Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency.

ACTION: Notice of intent to delete a portion of the Joslyn Manufacturing and Supply Superfund Site from the National Priorities List.

SUMMARY: The United States Environmental Protection Agency, (EPA) Region V is issuing a notice of

intent to delete a portion of the Joslyn Manufacturing and Supply Superfund Site (Site) located in Brooklyn Center, Minnesota, from the National Priorities List (NPL) and requests public comments on this notice of intent to delete. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is found at appendix B of 40 CFR part 300 which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). The EPA and the State of Minnesota, through the Minnesota Pollution Agency, have determined that all appropriate response actions under CERCLA have been completed. However, this deletion does not preclude future actions under Superfund. In the **RULES AND REGULATIONS** Section of today's **Federal Register**, we are publishing a direct final notice of deletion of a portion of the Joslyn Manufacturing and Supply Superfund Site without prior notice of intent to delete because we view this as a non-controversial revision and anticipate no adverse comment. We have explained our reasons for this deletion in the preamble to the direct final notice of deletion. If we receive no adverse comment(s) on the direct final notice of deletion, we will not take further action. If we receive timely adverse comment(s), we will withdraw the direct final notice of deletion and it will not take effect. We will, as appropriate, address all public comments in a subsequent final deletion notice based on adverse comments received on this notice of intent to delete. We will not institute a second comment period on this notice of intent to delete. Any parties interested in commenting must do so at this time. For additional information, see the direct final notice of deletion which is located in the Rules section of this **Federal Register**.

DATES: Comments concerning this Site must be received by March 21, 2002.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking (NPRM) in CC Docket No. 02-6 released on January 25, 2002. The full text of this document is available on the Commission's Web site Electronic Comment Filing System and for public inspection during regular business hours in the FCC Reference Center, Room CY-A257, 445 Twelfth Street, SW., Washington, DC, 20554.

This NPRM contains proposed information collection(s) subject to the Paperwork Reduction Act of 1995 (PRA). It has been submitted to the Office of Management and Budget (OMB) for review under the PRA. OMB, the general public, and other Federal agencies are invited to comment on the proposed information collections contained in this proceeding.

Paperwork Reduction Act

This NPRM contains a proposed information collection. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget (OMB) to comment on the information collections(s) contained in this NPRM, as required by the Paperwork Reduction Act of 1995, Public Law 104-13. Public and agency comments are due at the same time as other comments on this NPRM; OMB notification of action is due 60 days from date of publication of this NPRM in the **Federal Register**. Comments should address: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

OMB Control Number: None.
