SUPPLEMENTARY INFORMATION:

I. Abstract

The Leahy-Smith America Invents Act (AIA), Public Law 112–29 § 32 (2011) directs the USPTO to work with and support intellectual property law associations across the country in the establishment of pro bono programs designed to assist financially under-resourced independent inventors and small businesses. To support this, the USPTO—in collaboration with various non-profit organizations—implemented the Patent Pro Bono program; a series of autonomous regional hubs that act as matchmakers to help connect low-income inventors with volunteer patent attorneys across the United States. The Patent Pro Bono program comprises a network of regional hubs organized by various bar associations, law school IP clinics, and lawyer referral services that provide services across all fifty states, the District of Columbia, and Puerto Rico.

In 2022, the Patent Trial and Appeal Board (PTAB) began coordinating *pro bono* opportunities through the newly created PTAB Pro Bono Program, having supported the establishment of a national clearinghouse that acts as a matchmaker to connect under-resourced inventors with volunteer patent practitioners across the United States for assistance in preparing and arguing *ex parte* appeals before the PTAB. The PTAB Bar Association’s national clearinghouse provides access to legal representation for *pro bono ex parte* appeal services across all fifty states and the District of Columbia.

Each *pro bono* program will be requesting that their respective regional hubs and a national clearinghouse collect demographic information from those seeking assistance that will be self-identified by the applicant. The requested standardized demographic information, collected through Applicant Intake Forms, will be a

voluntary part of the overall application materials that each independent inventor fills out when seeking *pro bono* assistance. The information collected will be kept confidential by the regional hubs and the national clearinghouse and only aggregate information is shared with the USPTO. This aggregate information, will also be used to help determine the extent to which women, minorities, and veterans engage the Pro Bono Programs supported by USPTO.

This renewal of 0651–0082 broadens the scope of the information collection to include the PTAB Pro Bono Program, in addition to the Patent Pro Bono Program that was covered under this collection. The name of the information collection has been adjusted from “Pro Bono Survey” to “Patent and PTAB Pro Bono Programs” in order to include related programs under this single information collection. This information collection includes an instrument capturing data for the Patent Pro Bono program (Patent Pro Bono Survey) and

its applicant participations (Patent Applicant Intake Form). The information collection also has a similar instrument that covers the collection of data for the PTAB program (PTAB Pro Bono Survey) and the applicants requesting to participate in that PTAB offering (PTAB Applicant Intake Form).

II. Method of Collection

The Pro Bono surveys will be conducted electronically through web forms created to support these surveys. Applicant Intake forms may be offered electronically or in person depending the needs of the participating organizations.
