

owned and controlled by one or more qualifying veterans. A “qualifying veteran” is a veteran as defined by 38 U.S.C. 101(2) or a service-disabled veteran. A service-disabled veteran is an individual that possesses either a valid disability rating letter issued by VA, establishing a service-connected rating between 0 and 100 percent, or a valid disability determination from the Department of Defense or is registered in the Beneficiary Identification and Records Locator Subsystem maintained by Department of Veterans Affairs’ Veterans Benefits Administration as a service-disabled veteran. Reservists or members of the National Guard disabled from a disease or injury incurred or aggravated in line of duty or while in training status also qualify.

VA maintains a list of veterans and service-disabled veterans and will provide SBA with this data. To accomplish this, VA and SBA will participate in a Computer Matching program to match data in order to identify what veterans are qualifying veterans and to verify eligibility for SBA’s certification program.

Categories of Individuals: Small businesses owned and controlled by one or more qualifying veterans.

Categories of Records: Information relating to applicants to the Small Business Administration’s Veteran Small Business Certification Program. This is for small business owned or controlled by veterans.

Specific data elements to match from SBA are: Veteran Business Owner applicant’s first name, last name, tax identification number (SSN/ITIN), birth date, street address 1, street address 2, city, state, country, zip code, middle name, home phone, mother’s maiden name, gender, birthplace city, birthplace state, birthplace country.

VA will respond from match to SBA and return: Veteran’s combined disability data (disability rating and combined effective date); Service-connected determination (individual ratings, decision, effective date, rating end date, rating percentage; and Title 38 Veteran status data (veteran status and status not confirmed reason).
